sion of the opposition.

# Adelman Is Confirmed

WASHINGTON — Reacting to heavy lobbying by the White House the Senate voted 57-42 Thursday to confirm Kenneth L Adelman as the director of the Arms Control and Disarra.

Senator Charles H. Percy, Republican of Illinois and floor leader of the fight to have President Ronald Reagan's controversial nominee approved, said at the end of debate that because of commitments made by the White House, "Adelman has leverage" within the administration to press for arms control and reduction agreements

"and his supporters do too."

In a hashiy called news conference at the White House, Mr. Reagan announced that he was "deeply gratified" by the vote and added, "It is my earnest hope that this will mark the beginning of a new bipartisan consensus on the vital issue of nuclear arms reduc-

der Mr. Adelman the agency would by receive orated and would make an important contribution

to our arms reduction effort?" The margin in favor of the appointment was greater than expect-ed because several liberal Republicans who had been expected to te against Mr. Adelman gave their support at the last minute in response to presidential persua-

"We brought out the big guns."
3 Reagan aide said of the efforts in the past few days by Mr. Reagan, Vice President George Bush, Secre-tary of State George P. Shuitz and

Senator Arlen Specter, Republican of Pennsylvania, announced shortly before the vote that he would back Mr. Adelman. He said he had spoken by phone with the nominee less than an hour earlier and had received a "commitment that he would be the advocate for arms control and arms reductions

tion with Mr. Reagan as well as visits from William C. Clark, the president's national security adviser, and the two U.S. arms control negotiators, Paul H. Nitze and Edward L. Rowny.

Another liberal Republican, Sen-

ator Lowell P. Weicker Jr., Republican of Connecticut, said his support for Mr. Adelman was bar on a slightly different reason. He said he believed the "administration lacks a commitment" to an arms control agreement and he was voting for Mr. Adelman because he wanted the administration to have no excuse" for not coming up with

The administration also had requested \$1.7 billion in military aid, of which \$550 million would be in backtracking on international isthe form of grants and the rest in loans. The committee decided to allow \$850 million to be in the form of grants — an increase of \$300 million — leaving just \$850 million to be repaid, instead of more than \$1.1 billion.

# **Israel Hopeful** On Pullout Pact With Lebanon

By Edward Walsh

Washington Past Service
JERUSALEM — Buoyed by the severe setback delivered to President Ronald Reagan's Middle East peace initiative this week, Israeli officials have begun speaking with great optimism about the prospects for a troop withdrawal agreement with Lebanon.

Everybody has the impression we are reaching the end of the negotiations," a senior official said Thursday, "We all have the impres-sion that we are withio reach and it's not a matter of too much time." Another source familiar with the oegotiations confirmed that there is reason for optimism.

"They are very close," he said. But he added that unless there is agreement on the issue of the future role of Major Saad Haddad, a former Lebanese Army officer long allied with Israel, old issues in the talks could be revived and the entire agreement jeopardized.

The Israelis have been emphasizing for weeks their demand that Major Haddad be given a command role" in a security zone to be established in southern Lebanon as part of a troop withdrawal agreement. Lebanon has agreed that his Israeli-supplied militia can remain in southern Lebanon, but has the United States obligated itself is with Mr. Weinberger's policies role for Major Haddad, who faces

"The Americans are now more draft agreement."

interested in a settlement in Lebanon per se than a settlement in Lebanon as a corridor to some thing else" - progress on the Reagan plan for peace in the Mid-dle East, the Israeli official said.

The Israelis have long main-tained that the United States unnecessarily complicated the task of achieving a troop withdrawal by introducing an overall proposal for a Middle East peace settlement involving the Israeli-occupied West Bank and Gaza Strip.

At the same time, skepnes of Is-

raeli policy bave suggested that Is-rael has had an incentive to prolong the negotiations with Lebanon to assure that the Reagan initiative which was rejected out of hand by Israel - remain moribund.

What is unmistakable is that Hussein's decisioo to break off his talks with Yasser Arafat, the chair man of the Palestine Liberation Organization, and bow out of any oegotiating role on the West Bank and Gaza was a great relief to the Israelis. They were pleased that both the Jordanian government's announcement of Hussein's deci-sion and U.S. Secretary of State George P. Shultz's public comments on the subject put the onus for failure on Mr. Arafat and the PLO leadership.

■ Progress in Talks

Lebanese and Israeli officials ended four days of talks Thursday, and both sides said some progress had been made oo less contentious points of an agreement oo Israeli withdrawal, Reuters reported from Khalde Lebanon.

Yossi Amihud, the Israeli spokesman, said the negotiators "filled in the blanks" in a series of texts, but were still seeking accept able wording on other issues. He said the discussions had avoided the fature of Major Haddad.

In a statement, Mr. Amihud said: "At the end of four days of talks, one can definitely say that progress was achieved, understanding was reached on a series of points, and some drafting problems were resolved.

"Of course, there is still a lot of work to be done."

Lebanon's spokesman, Daoud Sayegh, said, "It is possible to say today that the negotiators have beother documents attached to the

Correction Of Satellite Is Hindered

WASHINGTON - Efforts to move a \$100-million communications satellite into proper orbit have been complicated because of apparent damage to several of the satellite's small thruster rockets.

NASA officials said Thursday. The satellite was put into space April 4 from the orbiting space shuttle Challenger, hut began circling the Earth in the wrong orbit. NASA scientists had planned to gradually shift the craft into the proper orbit through a series of firing from the satellite's one-poundthrust jets.

But Ron Browning, the NASA project manager, said Thursday that one or two of the satellite's 16 thrusters appear not to work because of damage incurred when the satellite was launched from the

Challenger.
"It does not mean we can't adhere to our objective. It just makes it more difficult," Mr.

He said he expects a delay of several weeks while scientists conduct further tests.

The Tracking and Data Relay Satellite, the world's largest and most powerful communications satellite, has been wandering off course since it was launched.

It was supposed to have orbited 22,300 miles [35,680 kilometers] above Earth, high enough that it would escape most of the planet's gravity. But a booster rocket failed and the craft entered an orbit 21,800 to 13,800 miles high.

publisher of the rightist daily Ka-thimerini. like a bushand promising a fur coat or jewelry and show-ing up with perfume, and not French at that."

Changes range from instituting civil marriage and divorce, decriminalizing adultery, overhauling the antiquated university system and granting of a general amnesty that allows tens of thousands of Greeks who fought on the Communist side in the civil war of the late 1940s to

returo bome. On paper, at least, the prime minister now stands on the threshold of a modicum of economic and financial prosperity, calculated to allow expensive structural changes delayed by a sluggish and vulnera-ble economy. If the world begins to emerge as forecast from the current recession, improved foreign-exchange income from tourism, ship-ping and remittances of foreign-based workers can stimulate the thin and lackluster economy.

Such a recovery would bolster Mr. Papandreou's political position. His party already controls 175 of Parliament's 300 seats.

After granting an average wage increase of 27.5 percent last year, concentrated among lower-paid workers, the government clamped on a salary freeze in January while letting prices rise as a way of damping down the economy. Infla-tion has been reduced from 25 percent to 20 percent annually, the search for fee income rather than balance-of-payments deficit is interest income on loans since the down from \$2.5 hillion to \$2 bilcapital ratios of most banks are un- lion and unemployment has been steady at approximately 8 percent.

Worrying to some observers is the government's apparent sense of insecurity, underlined by its ordering of an alert by the police, army and party on Feb. 27 when it apparently felt threatened by a possihle army uprising involving monar-

Neither Mr. Papandreou nor his ministers has explained the alert. In a country where the last military government ruled from 1967 in 1974 - the seventh such government in a century - this proved unnerving to many Greeks.
Equally opsetting has been Mr.

Papandreou's authoritarian attitude toward state television. It simply did not mention a disturbing neident in which a drowned ship worker's body was dumped inside the Merchant Marine Ministry to protest alleged lack of safety precautions by shipowners.

And when a prominent rightist newspaper publisher George Athanassiades was shot and killed recently, Mr. Papandreou personally intervened to fire a television news editor who broadcast a statepay more for those goods — in tons ment by the leader of the opposi-of cement, say — than if it had tion New Democracy party, Evanbeen a straight cash transaction. gelos Averolf, suggesting the crime

## Egypt and Jordan to Resume Trade

WORLD BRIEFS

Hussein Letter Said to Blame U.S

AMMAN, Jordan (Combined Dispatches) — King Hussein, in a letter to President Ronald Reagan, bas blamed the breakdown in his talks with the Palestine Liberation Organization partly on Washington's failure to recognize the PLO, Jordanian officials said Thursday.

The officials confirmed local press reports that Hussein sent a letter to

Mr. Reagan following Jordan's announcement Sunday that it was ahan-doning talks with the PLO on a Middle East peace move. They said the

letter cited U.S. "indecisiveness," its failure to pressure Israel into with-drawing forces from Lebanon and Israel's refusal to halt the building of

settlements in the West Bank.

Mr. Arafat left Tunis unexpectedly Thursday night for a two-day visit to Bulgaria, the Tunisian news agency reported. He had been expected to chair a meeting of the PLO leadership Friday to discuss the breakdown

Mubarak Reported to Reject Offer

CAIRO (AP) - President Hosni Mubarak was quoted Thorsday as saying that he had rejected an Arah offer of hillions of dollars in oil

revenues in return for scrapping the second part of the Camp David peace accords concerning Palestinian self-rule.

The account said Mr. Mubarak did not identify who made the offer hut some veteran observers believe he meant Libya. He was said to have

made the disclosure while briefing Egyptian journalists on the plane that carried him home Tuesday from a tour of five Far Eastern countries. His remarks were carried by the oewspaper Al-Ahram.

"Someone came to us saying that the Arabs are ready to give Egypt' several hillions of dollars in return for canceling the second document of

the Camp David agreement concerning a settlement of the Palestinian question, but we rejected the offer and will always reject such offers,"

Mr. Mubarak was quoted as saying. He said he had turned it down because Egypt would lose its credibility if it broke a commitment it had accepted voluntarily.

CAIRO (Reuters) — Egypt and Jordan announced the resumption of trade relations Thursday, four years after Arab nations severed all links with Egypt for signing a peace treaty with Israel.

Officials said the trade agreement stipulates the restoration of the 1978

protocol under which Egypt sold Jordan rice, onions, potatoes, peanuts, cotton and textiles and imported leather, woolen clothes and batteries. The agreement was signed by Mohsen Saleh Hourani, undersecretary in Jordan's Trade Ministry, and his Egyptian colleague, Ahmed Wafei.

#### Italian Farmers Protest EC Prices.

BRENNERO, Italy (AP) - More than 2,000 Italian farmers protesting the European Community's price policies staged a six-bour blockade of the Brenner Pass Thursday, cutting highway and railroad traffic between Italy and Austria.

The protest was called by farmers' associations in Lombardy, northern Italy. They were complaining that EC farm subsidies, aimed at evening out prices, had not been changed to reflect last month's 2.5-percent de-

#### Sofia Convicts 2 Italians of Spying

BELGRADE (UPI) - A Sofia court on Thursday sentenced two Ital ians to prison terms, after finding them guilty of military espionage, the

Bulgarian news agency BTA reported.

Paolo Farsetti, 34, and Gabriella Trevisin, 26, were sentenced respectively to 10½ years and three years in prison. Mr. Farsetti, while pleading not guilty to the military espionage charges, admitted to having inadvert ently taken pictures of military installations in the summer of 1982, BTA said. Miss Trevisin confessed to the charges, the agency said. Their law

yers said they would appeal the sentences.

The Italians were arrested on Aug. 26 on the Black Sea coast. The police said they had found pictures of military sites in their possession. Their convictions came at a time of heightened tension between Italy and Bulgaria, because of published allegations that the Bulgarian secret service may have been involved in the attempt to assassinate the pope in

#### Prima Linea Abandons Violence

BOLOGNA (Reuters) - Italy's leftist Prima Linea guerrilla group once the most powerful after the Red Brigades, has abandoned its armed struggle against the state, one of its leaders said Thursday.

Paolo Zambianchi, on trial for activities in the group's Bologna cell. said during a break in proceedings: "We have decided that the Prima Linea experience is over." Mr. Zambianchi said he spoke on behalf of all members of the group, which emerged in Turin in the mid-1970s. "We are no longer interested by armed actions which cannot be useful to the masses." he said.

Last year 87 of its members were sentenced to a total of 467 years in prison at the end of a mass trial in Bergamo. The present trial in Bolgona s being conducted simultaneously with another in Florence. Between them they involve many of the Prima Linea's leading figures. There are other trials in Rome and Milan. More than 2,000 leftist guerrillas are now in prison in Italy. In January, the Red Brigades announced that their armed struggle against the state was over.

#### For the Record

PARIS (UPI) — An estimated 150 striking medical students Thursday occupied the Arc de Triomphe, barricaded the entry to tourists and began a 24-hour sit-in. The police made no move to evict them. KHARTOUM, Sudan (UPI) - Sudanese voters went to the polls Thursday to cast ballots for the re-election of President Gaafar Nimeir

for a third six-year term. BOGOTA (AP) - Leftist guerrillas in Colombia Thursday freed Kenneth Bishop, a Texaco executive, 38 days after they kidnapped him. It was not known if any ransom was paid.

PALERMO, Sicily (Reuters) — Seven men, including two reputer-Mafia chiefs, were shot and killed Wednesday, continuing a series of murders that have already resulted in five deaths this week. WASHINGTON (AP) — The Senate Budget Committee was dead-locked Thursday over a possible tax increase for 1984 after a Democrat-

ic-led move to dismantle much of President Ronald Reagan's tax program failed on a 11-11 tie vote.

# Fighting Again Delays Talks on Gulf Oil Spill

that it had taken back some of its oil a day are estimated to be pourterritory from Iraqi forces, but Iraq, denying the claim, said its troops had destroyed most of three tranian divisions since Iran launched an offensive oo Sunday. The hostilities continued to de-

lay talks aimed at controlling a vast oil spill from Iranian oil wells. The spill from the wells has reportedly spread the length of the Gulf. "Islamic comhatants liberated

new strategic heights early this morning, passing through mine fields [and] explosive traps," IRNA, the Iranian news agency. reported Thursday.

A military communiqué reported by the Iraqi News Agency, however, said Iranian forces "have failed to capture a single inch of Iraqi territory." It added that 9,832 tranians had been killed since the start of the offensive.

The agency broadcast, moni-tored in Beirut, said Iran had lost 24 tanks, 18 troop carriers and 28 trucks. It did not detail lraqi losses.

Independent confirmation of the claims could not be obtained.

perts to cap the damaged oil wells

Compiled by Our Staff From Dispatches MOSCOW — The manager of Moscow's best- had previously protected them from the law. known food store and four of his department ma agers have been arrested and charged with stealing large quantities of food and taking bribes," a

newspaper reported Thursday.
Yuri K. Sokolov, director of the Gastronom No. I on Gorki Street, had long been rumored to have been in legal difficulties for his activities at the

Moskovskaya Pravda. organ of the city's Communist Party organization, said "criminal proceedings" were started against Mr. Sokolov and his department chiefs in November. The newspaper also reported that M.A. Ambart-

sumvan, the director of a Moscow district food distribution center his two deputies and three warehouse managers also were arrested and charged for allegedly taking hribes and stealing fruit and vegetables

Mr. Sokolov's arrest was seen as a signal that the authorities had decided to move against hla-

tant corruption among officials whose seniority

was either the legacy of the previ-

ous administration, or the policies

of other Western countries - the

Gastronom No. 1 is still known as Yeli after its pre-revolutionary proprietor and retains a chandelier and wood-panel style from that era. Soviet sources said Mr. Sokolov enjoyed a lux-

urious life style and maintained a large villa in the country. He was known to enjoy the acquaintance of senior political figures and was therefore considered a secure member of the establishment. According to several witnesses, the store was

sealed off by police in the first week of November while officials carried out a search for hidden foodstuffs ready for sale on the black market.

The store is one of the most prominent in Gorki Street, the main shopping avenue, which stretches

north from the Kremli The newspaper report said investigations were

still being carried out but did oot indicate when Mr. Sokolov and the 11 charged with him would go on trial.

# Recession Reshapes World Trade

(Continued from Page 1)

launched last year, but now worth \$515,000) be matched dollar-fordollar hy Indonesian exports, excluding oil or gas. The program has run into considerable resistance ahroad and sources report that it

will soon be modified substantially. The practice, however, is hy no leans limited to "ponr" countries. Australia, Canada, Belgium, the Netherlands, Switzerland and New Zealand have all resorted to countertrade to finance very costly imports - usually of defense equip-

negotiated a countertrade program to offset the cost of Northrup fightve become trapped in so-said Representative Northrup agreed to market nonagricultural products from 210

raised the ante 10 goods worth 50 ments — insisting that its purchases exceeding 500 million rupians es exceeding 500 million rupians as exceeding 500 million rupians percent of contract value — \$150 million worth of 800ts, says George Reed, formerly Northrup's industrial offset expert and oow president of Boles World Trade Corp., a California-based counter-

trade company. Unul recently, countertrade was the province of multinationals companies whose diverse operations could use the product pur-chased or whose global marketing provided the knowledge of who would want to buy the product.

Increasingly, however, the field is opening up to smaller compa-nies. Middlemen are proliferating The Swiss in the mid-1970s particularly banks which have the muscle to finance such operations and which can use their intimate knowledge of their clients to put a buyer in touch with a seller.

Banks are especially keen to get Swiss companies worth \$136 mil- into this business as they earn a lion — or 30 percent of the price of commission from the huyer as well

the aircraft. A subsequent contract as the seller. In addition, the fashion in hanking nowadays is to search for fee income rather than der pressure from the had or questionable loans on their books. The multinationals, meanwhile,

are moving beyond countertrade to what Paul Percie du Sert, treasurer of Renault, calls intertrade. "It implies considering the relations with developing countries as a global relationship, keeping in mind that we shall not develop these countries with credits. When two children play mar-

hles, and one loses, the other gives back half his marbles because the important thing is to play. I think that this is the core of the problem. if we don't give some marbles hack to the developing countries to play with, then we won't be able to play marbles any more.

"We have to integrate such commercial approach, which means not only the physical exchange of commodities or products, but also designing systems that would develop cash flow possibilities for developing countries." Experts are divided about the economics of countertrade. It is usually inefficient in that an im-

porter of Western machinery will

"You price your product after was politically motivated. you know what your countertrade obligations will be," says a trader. As for its economic cost, one expert replies: "How do you measure what it costs to keep people employed instead of unemployed; what it costs to idle production fa-

#### INTERNATIONAL HERALD TRIBUNE, FRIDAY, APRIL 15, 1983

# Poland Said to Defer Approving U.S. Envoy

WARSAW - Poland is holding up approval of a new U.S. ambassador until the Reagan administranion makes "a sort of positive gesture" toward Warsaw, according to

a senior Polish official The official said the nominee --John D. Scanlan, a career Foreign Service officer — had been pro-posed more than three months ago by Washington. Ambassador Fran-cis Mechan, whom Mr. Scanlan was to replace, left Warsaw in representative and the embassy is under a lower-ranking diplomat.

The State Department declined

official said Mr. Scanlan, who has served three times in Poland, is now at the Fletcher School of Law

and Diplomacy.

The Polish Foreign Ministry oflicial, who spoke Monday on condition he not be named, indicated

belond had intended to take steps toward further national reconciliation before Pope John Paul Il's arrival for a visit June 16 in Poland. He asserted, however, that the United States must make the first move in U.S.-Polish relations. Poland's Communist authorities

the pope, nor would it meet calls by the Roman Catholic Church for

the West worsened after the decla-ration of martial law in December 1931 and the imposition of Westem economic sanctions.

The Reagan administration has suspended agricultural credits to Poland, banned Polish fishermen operating in U.S. waters and re-voked landing rights in the United States for LOT, Poland's national airline. Washington has also blocked negotiations on rescheduling Poland's official foreign debt and on Poland's joining the Inter-oational Monetary Fund.

After the formal abolition of the independent trade union Solidarity last October by the Polish parlia-ment, the United States also withdrew Poland's most-favored-nation trading status, effectively raising the prices of Polish imports.

Poland's relations with West Enropean states have been disturbed by the sanctions, but the Warsaw government has singled out the Reagan administration for harshest

treatment as the main instigator o the East-West confrontation. The official confirmed that a

Polish Foreign Ministry department chief, Jan Kinast, visited Washington in early February for exploratory talks and was led to believe that a re-evaluation of U.S. policy would produce something in "two or three weeks."

A U.S. diplomat said that Mr. Kinast had met with Undersecretary of State Lawrence S. Eagleburger, among others, for general discussions on U.S.-Polish rela-tions but that "no commitments

"We are waiting for a sort of positive gesture on your side," the Polish official said, adding, however, that he did not mean to make a "formal linkage" between such a gesture and approval of Mr. Scan-

There has been much speculation that the papal visit would provide an opportunity for the government of General Wojciech Jaruzelski to ease certain repressive mea-sures and for Western governments

the United States must make the first move in U.S.-Polish relations.

Poland's Communist authorities have been refuctant to appear to be making concessions under pressure from the church or Western states. But the ministry official said the papal trip, although ostensibly a religious pilgrimage, would have a political impact.

He said Poland would not lift martial law before the June visit of the pope, nor would it meet calls

moves the government is consider-ing. What he did outline appeared to fall short of the Reagan adminisby the Roman Catholic Church for tration's conditions for an end to a general amnesty for political prisoners. But he added "there will be martial law and the restoration of a a lot of improvements" before the pope's arrival.

Relations between Poland and the West worsened after the decla-

BACK ON TOP — Fifty years after King Kong scaled the Empire State Building in the 1933 film classic, the giant gorilla returned — in the form of an eight-story balloon — to New York City. An attempt to position the balloon last week failed. After hanging around the skyscraper for a week, Kong will be taken on tour to mark the movie's anniversary.

# Chicago Vote: Democrats Avert a Split

By Howell Raines New York Times Service

NEW YORK - The margin of 40,000 votes that gave the Chicago mayoral race to Representative Harold Washington also spared the national Democratic Party from a damaging loss of prestige and, for flict among blacks and whites within the party.

For that reason, the Chicago election will be remembered by party leaders as one in which they may have dodged both an immediate disaster and a long-term disruption. The disaster, of course, was the prospect of losing for the first cans believe voting irregularities time in 56 years, a mayoral election in a city with a heavy Democratic majority and a tradition of party-

ine voting.

Although the party suffered a collapse of that discipline, it avoided the humiliation of an outright defeat. Moreover, in responding to white Democrats' rejection of Mr. Washington, who is black, the national Democratic leadership also helped diminish the chances of a breakaway presidential campaign by a hlack candidate in 1984.

ing Mr. Washington for racial rea. was a member of a minority group.

Unable to deliver the white vote for Mr. Washington, the Demo-cratic National Committee instead gave him more money and more campaign support than any mayo-ral candidate has ever received. Committee officials also dispatched the party's white presi-dential candidates in a display of solidarity aimed more at the na-tional black leaders than at Chicago's racially polarized electorate. Now it appears that these efforts, along with the 18-percent white vote that provided Mr. Washington's margin of victory,

may be enough to drain the emo-tional energy from the drive for a pay a price for Mr. Washington's White vote was about average for black presidential candidate.

# Bearing Witness, 1983

Sleep toward them like a white moon, There was the doll with cheeks derouged by kisses

In one arm. The stuffed pet, already Brought to life by lave. In the other -Now blows the wind of dying, Blows the shifts over the hair That no one will comb again.

Those lines are from "O the Night of the Weeping Children!" by Nelly Sachs, who fled Germany in 1940 and won the Nobel Prize for Literature in 1966.

Among the children with unkempt hair whom she memorialized are Elliott Zaretsker's three brothers and sisters, Sam Sherron's two sisters, a young girl whom Jenny Eisenstern

saw lie down and refuse to wake up, and the babies Adam Tems saw thrown into a truck. Mr. Zaretsker, Mr. Sherron, Mrs. Eisenstern and Mr. Tems are among the thousands of Holocaust survivors meeting in Washington this week. So are Esther Kozminski, who hasn't seen her sister since Dec. 6, 1940; Bella Cantnarski, whn was hiding in the woods when the war ended and recalls, "It was so quiet. I said to myself, "Where's God?" — and Jan Weis, who says, "I wanted to bear witcess, to let everyone know: It happened. I was there. I survived."

Describing the death camps that housed the weeping children, their parents and those few who lived to bear them witness. Nelly Sachs wrote, "Sleep may not enter here."

Neither should it ever be allowed to enter

the world's memory. -THE NEW YORK TIMES.

# **Democracy in Ecuador**

Countries pay a price, in North American media neglect at least, when they fail to stage the wars and revolutions that make up the stuff of most news, especially news of Latin America. Let us try to remedy some small part of that customary condition by saluting the president of Ecuador, Osvaldo Hurtado.

An academic and a Christian Democrat who is now 43, Mr. Hurtado helped lead his country out of military dictatorship in 1979. becoming the elected vice president and then the president. Ecuador was promptly hit by its greatest economic crisis in 50 years. Part of that crisis arose from the familiar interaction of poverty, painfully uneven development and world recession. Another part flowed from the readiness of Ecuadoran military leaders of the 1970s to accept the immense loans that Western private bankers pushed upon them at a time when Ecuador was selling its modest amounts of oil for up to \$40 a harrel. (The current price is \$30.) As a result, not only were economic health and social peace nn the line,

so was the life of Ecuador's reborn democracy. Ecuador is not out of the woods, and it may not be, even if things go smoothly, in this decade or even in this century. It is worth observing, however, how Mr. Hurtado managed Ecuador's latest ordeal just a few weeks ago. The International Monetary Fund and the private hanks, hy way of agreeing to refinance \$2.5 billion of Ecuador's \$6.3-hillion foreign debt, had decreed the usual severe austerity measures; a second devaluation of the sucre, sharp increases in the prices of milk and fuel, and so on. The students came out in the streets, the unions called a strike. Mr. Hurtado, explaining the need, held firm, and calm was soon restored, without untoward violence and with-

out the military coming out of the barracks. President Hurtado has earned not only respect for his leadership but a hearing for his appeal for international cooperation, especially cooperation among the democracies of the Western Hemisphere.

-THE WASHINGTON POST.

## The Result in Chicago

Harold Washington has been elected mayor of Chicago by a large enough margin to quash any doubts about the integrity of the result. He has won a decisive, if hy no means overwhelming, victory. Now the difficult work begins. The mayor-elect will have in try to satisfy the expectations of his followers and persuade those who bitterly opposed him that he is giv-ing heed to their legitimate toterests. That is not easy, but it has been done before, to other cities, by mayors both black and white.

Some people have treated this contest as if it were the first time a black candidate with an almost entirely black constituency ran against a white candidate with an almost entirely white constituency for control of a major city's government. We think it is more likely to turn ed States is for both black and white voters to just those in Chicago, might keep in mind. support candidates on the basis of issue posi-

tinns and priorities, regardless of race, and for black and white candidates to seek support from voters of both races.

Increasingly, both blacks and whites no longer believe that their interests can be served only by officeholders of their own race. That is why the ugly racial appeals to Chicago are probably not a preview of the politics to come but a reprise of politics that is, fortunately, not nearly so common as it used to be.

Still, there is no cause for smugness here. The Chicago campaign shows how easy it is to inflame feelings of racial batred and distrust that still exist in the hearts of too many Americans. A few careless remarks, some ill-advised campaign strategy - and a great city is engulfed in fear and animosity. That is some-

#### This Year's Crop of Films

Social significance figures in all the movies nominated this year for major Academy Awards. They express perhaps the most posi-tive feature of American democracy: a constant striving for improvement, an upward mobility of popular culture.

To get a feel for the quality of this year's crop, it is useful to recall winners from the past. Movies with important themes have ofien done well. Recent winners include "Ordinary People," which dealt with the breakup of a marriage, and "One Flew Over the Cuckon's Nest," which had madness as its subject matter. But back in 1959 there was "Ben Hur," a saga of charioteering in ancient Rome utterly empty of meaning. Twenty years before, the palm went to "Gone With the Wind," a saccharine drama of an Old South that never was.

This year every film to reach the top addressed itself directly to some kind of social or political problem. "Gandhi" commands spe-cial notice in that respect. For it introduces into the "Ben Hur"-type saga the political message of passive resistance.

"Sophie's Choice" is set against the back-ground of the Holocaust. "The Verdict" centers around corruption in the legal profession. Missing" features violence and an official cover-up to Latin America. "E.T." explores the difference in perceptions that separates adults from children. "Tootsie" casts the everlasting war between the sexes in the dimen-

sions of a role reversal The nominees for the Academy Awards, and "Gandhi" especially, bear witness to the questing spirit, the ceaseless effort for spreading everything, including comprehension, to wider and wider circles. America, in other words, houses an aspiring society.

#### Syndicated columnist Joseph Kraft. The West German Census

The decision by West Germany's highest court to block the execution of a population census due to start at the end of the month is a salutary one which ought to give comfort to democrats everywhere. It is of particular relevance in Britain, where strong and entirely understandable misgivings were voiced in Parlia-ment only this week about our own feeble and lopsided Data Protection Bill.

The Constitutional Court in Karlsruhe, in the equivalent of an interim injunction, lent strength to a powerful groundswell of protest which runs right across the political spectrum. Whatever its final judgment on the 1982 law which set up the census and on the intense detail demanded of respondents, the court has made a fundamental libertarian point by rul-ing that its legality must be established before, rather than after, it is carried out.

#### - The Guardian (London) . Bartenders vs. Drunks

America needs more people like the National Bartenders Union. Last week it called for all states to raise the legal drinking age to 21, even though such a standard probably would put some bartenders out of work. Main reason for the stand is the climbing rate of traffic

deaths caused by drunken driving.

#### 1908: Tehran Police Apologize

TEHRAN — It now transpires that in addition to committing the offense of forcing their way into women's apartments of a house during a domiciliary visit in search of the perpetrators of the recent attempt on the life of the shah, the police also stole property. The house they thus broke into was that of two Russian subjects. The latter were arrested but the en-quiry held by the Minister of Justice failed to find any proof of guilt. The men were handed over to the Russian Legation. The Governor of Tehran made his excuses to the Russian Legation and promised restitution of the prop-Governor and the Superintendent of Police being brought to trial and punished.

1933: Swastika Angers French METZ, France - Four German tourists who declared they intended visiting the battlefields in France over the Easter holidays were roughly handled by a crowd because they refused to detach a small triangular pennant with the Nazi emblem from the rear of their automobile. The Germans, coming from the Rhine-land, stopped in front of the Metz station to buy newspapers. They were asked to take down the swastika emblem and on refusing to do so, one of the crowd struck the chauffeur in the face. Police asked the Germans in follow them to the police station, where their erty stolen. The public, however, insists on the passports were found in order. The Germans declared their right to fly the swastika, since it was now Germany's national emblem.

# Sartawi: 'In Worlds We Create'

BOSTON — Dr. Issam Sartawi, the PLO diplomat, knew he was risking his life when he spoke out for peace with Israel. And he knew who the likely killers were: the Abu Nidal gang. When I saw him in Paris last year he told me how the gang had murdered other PLO moderates as well as, in his the gang had murdered other PLO moderates as well as, in ms words, "carrying out a series of atrocious acts against Jews in Europe." But if the risk was known, the reality of Dr. Sartawi's assassination by an Abu Nidal gumman in Portugal last Sunday was a horror beyond anticipation.

Nothing has brought home so grinly, for me, the irrationality that obstructs peace in the Middle East.

And after the brutality of the murder there was the cynicism of crocodile tears. On all sides, men who had rejected leaves Sartawi is life praised him to death.

Issam Sartawi io life praised him to death.

Yasser Arafat, blaming the murder on "Zionist intelligence," said Dr. Sartawi's death was a great loss to the Palestinian cause. But on that very day Chairman Arafat failed the test of courage that Dr. Sartawi knew was essential to Pales-

tinian hopes; demonstration of the courage to support negoti-

ations with Israel about the West Bank. In his years of exploring avenues to peace, Dr. Sartawi was operating on behalf of Mr. Arafat, but the chairman seldom acknowledged it. When the Palestine National Council met to Algiers to February, he prevented Dr. Sartawi from speaking.

The Israeli government's reaction to the assassination was also cynical. The cabinet secretary, Dan Meridor, commented that Arabs who talk to Israelis "are sometimes shot and killed." The Begin government has not encouraged Israelis to talk with PLO figures. Doves who met with Dr. Sartawi over the years found themselves denounced at home.

The leader of Israel's Labor opposition. Shimon Peres, was

The leader of Israel's Labor opposition, Shimon Peres, was at the Socialist International meeting in Portugal where Dr. Sartawi was murdered. The day before his death, Dr. Sartawi wrote a letter to him calling for a negotiated settlement as "the only civilized solution for the Middle East."

But Mr. Peres had lobbied at the meeting to exclude Dr. Sartawi from official participation. Israel's supposed alternafive to Menachem Begin was so spineless that he did not want to be seen at a Socialist meeting with a moderate Palestinian.

The American record to relation to Dr. Sartawi is not full of courage either. Secretary of State George Shultz spoke with regret of the murder of "a moderate Palestinian." But for many years, under both Republican and Democratic administrations, Dr. Sartawi was prevented from coming to America. American officials were atraid of Israeli criticism if "a moderate Palestinian" made reasonable speeches in America. If those who now praise Issam Sartawi mean it, they will do something about the ideas he cared for so passionately.

The passion is there in the notes of my talks with him, The evil of Abu Nidal's avowed policy of murder was one subject that exercised him. The gang had admitted an attack on a Vienna synagogue, he noted, and on Jewish schoolchil-

By Anthony Lewis

dren in Antwerp. "For God's sake," Dr. Sartawi said, "why doesn't the world protest these acts of anti-Semitism? People

doesn't the world protest these acts of anti-Semitism? People have no right to keep silent in the face of such things.

"And Abn Nidal is unable to act without support. If the world pointed a finger at his supporters, it would help in forcing them to stop." He meant the governments of Syria and Iraq, which agree on practically nothing except support of Abn Nidal, in money and refuge. They have, Dr. Sartawi said, a responsibility when the Abn Nidal gangsters strike.

Even the Israeli government has failed to acknowledge the particular character of Abn Nidal. It used an Abn Nidal attack on the Israeli ambassador in London last June as the evense to invade Lebanon, calling it a PLO attack. But the

excess to invade Lebanon, calling it a PLO attack. But the killers had PLO officials on their assassination list, too.

Peace was of course the other subject of Dr. Sartawi's passion. He believed that there was a will for peace, among Issued and Pulsarinana of the page of the page.

raelis and Palestimans, even when their leaders seemed un-compromising. "That's normal," be said. "People want to live. One of the sad things is the failure of the peace camp in Israel to get enough recognition in the United States or Europe."
But whatever happened politically in Israel, he wanted the

Palestinians to act for peace — io their own interest, because war would not give them the homeland they wanted.

"I think we must come out unambiguously," Issam Sartawi said, "for two states living side by side in peace — unilaterally, regardless of what the Israelis do. Chairman Arafat will have to decide sooner or later."

"I be decided "We live in studies are greate for ourselves."

He added: "We live in worlds we create for ourselves." The New York Times.

Keep moving or those birds will get us.

# Sartawi: For 'Just and Lasting Peace'

DARIS — The failure by the United States to recognize the Palestine Liberation Organization is a troubling blot ou the American diplomatic record. The moral and political imperatives that characterize Palestinian-American relations argue urgently for a serious effort to correct this anomaly. For its part, the PLO has done what it can to remove the obstacles to better relations - demonstrating the strong desire of many in the organization for a

iust and honorable peace.

The Palestinian people's claim to nationhood and their right to choose their own representatives should be accepted. by the United States as an inalicnable right - a right that cannot be denied on grounds of political expediency and shifting definitions of national interest. Nor should recognition of this claim be subordinated to the will of a third party, It is a decision that bears directly on

America's long-range interests. The most serious obstacle to improved relations was created by then Secretary of State Henry Kissinger in 1975 when he stated that the United States would not recognize the PLO until it recognized Israel's right to exist and accepted United Nations Security Council Resolution 242. Since then, successive U.S. administrations have ratified the Kissinger commitment, making it the backbone of America's Middle East policy.

The government of Israel has greatly

Dr. Issam Sartawi, the PLO's roving envoy who was assossinated Sunday in Portugal, wrote this commentary shortly before the recent Algiers meeting of the Palestine National Council.

when it found such ties convenient, Early this year, for example, the Begin gov-ernment sent an Israeli delegate, Arie Eliav, to negotiate with the PLO about exchanging prisoners. Thus, ironically, Israel permitted itself what it adamantly denied to the United States.

Yet neither the Kissinger edict nor Israeli pressure has prevented Palestinian-American contacts. On several occasions American authorities accepted di-rect PLO help, as for example in 1976 when the PLO protected and provisioned the U.S. Embassy in Beinst and helped evacuate American citizens from Lebanon. This so impressed Mr. Kissinger that he sent a personal letter of thanks to Yasser Arafat.

Some years later, during the Iranian hostage crisis, the PLO was instrumental in arranging the release of female and black American prisoners. Secretary of State Cyrus Vance acknowledged this help with another message of thanks to Mr. Arafat, Clearly, Palestinian-American contacts can be of immense value to both sides. More recently, the assistant secretary

of state for Near Eastern affairs, Nicholas A. Veliotis, stressed that the Reagan benefited from Mr. Kissinger's commit-ment — even though the Israeli govern-ment itself sought contact with the PLO invitation for the PLO to establish relamitment not as an ultimatum but as an tions with the United States. A careful review of the Palestiman record demonstrates that the PLO has formally accepted this invitation by removing the last remaining obstacles in the way of formal relations with the United States. The Palestine National Council took

the first important step in April 1981. when it unanimously endorsed the Leonid Brezhnev initiative calling for "ensuring the security and sovereignty of all the states in the region including those of Israel." Clearly this amounts to.

an explicit recognition of Israel.

The PLO has also formally accepted all the principles of Resolution 242 ex-cept the paragraph — which even the United States has abandoned — that describes the Palestinian problem as. a refugee question.

a rerugee question.

Finally, in January the PLO went beyond both Mr. Kissinger's conditions, and the Veliotis tovitation when Mr. Arafat received an Israeli delegation headed by a retired general, Mattityahu, Peled. The joint communique from the meeting, which was simultaneously broadcast by the official Palestinian. news agency, Wafa, and the Israeli me-dia, announced to the world that agreement had been reached on joint Palestinian-Israeli action to establish a justand lasting peace to the Middle East.

No one imagines that the road topeace will be easy, but, despite the divisions among us, we in the PLO have amply demonstrated a commitment to a just peace. It is now up to the United States to reciprocate.

The New York Times.

# On Pershing-2s and the Security of Western Europe

WASHINGTON — The United W States, absent an arms agree-ment in the Geneva talks which would make such a step unneces-sary, is to begin deployment to Europe of a new intermediate-range missile later this year, the Pershing-2. Like the ground-launched cruise missile, which is also scheduled for de-

ployment this year, the Pershing-2 has a range sufficient to reach targets to the Soviet Union. The deployment of the Pershing-2

would fulfill a commitment to our NATO allies to respond to the mas-sive Soviet buildup of SS-20 missiles. It would, of course, be unnecessary if the Soviets accepted President Reagan's offer to eliminate this entire category of nuclear weaponry.

The Soviet Union, not surprising-

ly, would prefer a different outcome: that the Soviets keep their missiles, while we not deploy our own. The Soviets have mounted a major

political and propaganda effort to forestall Pershing-2 deployment, al-leging that the missile is a uniquely dangerous terror weapon, that it has a "first-strike" capability against Soviet strategic forces, and that, in con-sequence, the Soviet Union will have to adopt a "launch-on-warning" poli-

cy if the Pershing is deployed.

None of these charges bears serious scrutiny. The Soviet Union's choice of this line of argument, however, does reveal a good deal about its view of Western Europe and about the relationship it would like to establish between European secur-ity and that of the Soviet Union. Any nuclear-armed missile is, of

course, a terrifyingly destructive weapon. Therefore, alleged Soviet concerns over the Pershing-2 have to be put into some perspective.

This American missile is consider-ably less destructive than the SS-20. It has a much shorter range, 1,800 vs. 5,000 kilometers. It has only one warhead, as compared with the three warheads on each SS-20. That single Pershing warhead is less powerfu than any one of those on the SS-20. The Pershing flies no faster than the SS-20. It could reach targets in the Soviet Union no more quickly than Soviet land-based missiles can presently reach targets anywhere in West-ern Europe, or than Soviet sea-based missiles can presently reach targets in the United States.

Finally, there will be, at the conclusion of U.S. deployment, only 108 Pershing-2 missiles and 108 warheads deployed. There are 351 SS-20s deployed today, with 1,053 warheads, and the number continues to grow. Clearly, then, there is nothing uniquely threatening about the Pershing-2 missile.

The Soviet claim that the Pershing-2 represents a first-strike threat has even less substance. Ninety percent of Soviet strategic forces will be out of range of the Pershing-2. Soviet strategic command and control links, centered on Moscow, will also be out of range of the Pershing-2. In any case, the 108 Pershing-2s to be do ployed are so few, when compared **By Richard Burt** 

The writer is U.S. assistant secretary of state for European affairs.

the concept of the Pershing-2's use for a pre-emptive strike against the Soviet strategic force is Indicrous.

Years, Pershing-2 will be deployed in only one country, West Germany.

If the Soviets can succeed to block
Western Europe must realize, the

It is consequently difficult to take seriously the Soviet threat to move to a launch-on-warning policy as a re-sult of Pershing-2. Given the much and put themselves in a much stronggreater vulnerability of the U.S. ICBM force to Soviet strategic missiles, it also seems unlikely that er position to then block deployment of cruise missiles in all these countries, including West Germany. Americans will feel much sympathy

The essence of Soviet arguments against the Pershing-2, and against the whole concept of NATO's INF deployment, is that it is unacceptable for them to have to face a threat from Western Europe comparable to the threat they pose to Western Europe. For the Soviets to build and deploy new missiles with the mission of targeting all Western Europe from Soviet territory is, they imply, a fact of life, to which Western Europe must acquiesce. For NATO to respond by stationing missiles in Western Europe of comparable capability some-

ing Pershing-2 deployments in West
Germany, they will knock out a major element of NATO's 1979 decision

Soviet Union insists, that its security is less important than that of the Sojor element of NATO's 1979 decision viet Union. European security is explicitly subordinated, in Soviet think-

ing, to that of the Soviet Union. This Soviet view of European socurity makes the Soviet reaction to the NATO decision of 1979 to deploy American intermediate-range missiles to Europe much more com-prehensible. The current objective of Soviet policy is to employ its geopolitical advantage and its regional nu-clear superiority to intimidate West-ern Europe and force West European

accommodation to Soviet interests. The deployment of 572 new American missiles, capable of reaching only limited areas of the Soviet Un ion, has little impact upon the U.S.-Soviet balance, at a time when both

heads, deliverable ou short notice to any location in the other's country Yet by firmly linking U.S. power to European security, this deployment will prevent Moscow from making Western Europe a nuclear hoster and thus achieving its objective of caforcing the subordination of Europe-

an security to its own.
This is why the Soviet Union has reacted so strongly against NATO's 1979 decision. This is why the Source Union has put forward its implansihle, and otherwise inexplicable, case against deployment of 108 Pershing 2s. This is why West European lead ers, recognizing true Soviet motiva-tions, have invested so much of their own political capital in maintaining the decision agreed upon in 1979.

The Soviet Union seeks to force its view of European security upon Europe. Europe's leaders, on the other hand, are determined, whether through arms control or deployment to ensure that the security of Europe is not accorded a lower priority thanks that of either of the superpowers.

DAVID WARDEN.

#### The 731st Regiment

Regarding "Few Reminders of War-time Horror" (IHT, March 23): I was toterested to read Christopher Wren's account of his visit to the site to China where the Japanese Army's germ warfare unit, the 731st Regiment, carried out "some of the worst atrocities of World War II."
But I am also interested to notice that U.S. outrage about American protection for the likes of Klaus Barbie (IHT. March 29) does not seem to extend to U.S. protection for Japan's

germ warfare specialists. Mr. Wren writes that Lt. Gen. Shiro Ishii, the regiment's commander, "reportedly made a deal" with the United States. Members of 731 have described to detail how they were debriefed by U.S. authorities in Japan, explicitly to return for protection from the Russians. Colleagues of Ishii have described how he was not only protected by the United States but actually taken to America, apparently to Fort Detrick, Maryland. His

trail goes dead in late 1949. America did more than just protect 731's personnel. When the Russians put some of 731's officials on trial in 1949, the United States (a) failed to with the 2,350 currently deployed So- 1949, the United States (a) failed to had resulted from friction among the vict strategic ballistic missiles, that provide any of the corroborating evi-

dence it had, (b) failed to publicize the charges on what were, after all, toternational war crimes, and (c) did what it could to discredit charges which it knew to be true. As late as 1979, a senior U.S. official was calling the trial "just propaganda" and "a lot of baloney."
It is admirably restrained of the ese not to want to push the mat-

ter further, but what about the United States? These people were the Jap-auese equivalent of Dr. Mengele — if possible, even worse than Barbie.
What did the United States want
them for? Has the time now come when it might be possible to find out what Ishii and his colleagues gave the United States that was so valuable? And where was Ishii between 1949 and his reported death to 1959? The Chinese official interviewed

by Mr. Wren at Harbin says that no Americans were used in 731's experiments. Evidence brought to light by John Powell and the Bulletin of Atomic Scientists contradicts this and suggests that the United States covered this up, too, as revelation of it would have blown the U.S. government's cover-up for the 731 gang. is it too much to ask what America

was doing protecting a large group of Mengeles, bringing them to America and apparently taking over their work? And stopping others from bringing them to justice? Why so littic outrage, and no investigation? JON HALLIDAY.

Terrible Consequence

Regarding "Assessing a German Era's Far-Reaching Legacy" (IHT, April 6) by David Schoenbaum: The victors in World War L which had resulted from friction among the problem and left a great deal of dynamite behind them. Hitler being the villain who eventually lit the match. Had he not been there, someone else could have done so. Hitler himself was surely the most terrible example of the consequences of such failures. GUSTAV ADOLF POURROY.

#### : Singapore. Nudging a Renaissance

It may not be too late to return to the subject of the French government's conference of artists and intellectuals and George Will's raucous immendo (IHT, Feb. 17) to the effect that nobody can take Norman Mailer seriously and that a lady as well-endowed as Sophia Loren can only have a birdbrain — ergo, the French government must really be in a bind if it turns to these people for advice.

But the French government was not asking anyone for outright prac-tical advice. It was seeking to give an impetus to imagination in Western society by soliciting people whose business is imagination. The assumption is that while we are in an economic crisis, the crisis is not merely economic, and that the outcome depends on finding solutions that are

not only practical.

Mr. Will may have forgotten that revolutions that are not always violent incubate in the more generous imaginations of an epoch. This was

# House Panel Chairman Sees Violation in U.S. Actions in Nicaragua

By Martin Tolchin New York Times Service man of the House Intelligence

Committee says that the adminiscaraguan rebels.

Representative Edward P. Boland, Democrat of Massachusetts, made the remarks Wednesday and consider appropriate acroon, At a marass two-and-a-half-hour meeting, the committee agreed to invite both Secretary of State George P. Shultz and William P. Clark, the president's national security advises; to ment-i

explain U.S. policy in Nicaragua.
The committee discussed a proposal to cut off funds for the covert operation. "If there had to be a vote taken, there would probably be enough votes to cut off the funding," said Representative Nor-man Y. Mineta, a California Dem-

The committee also heard a lengthy report of a recent visit to Nicaragua by Representative Wyche Fowler Jr., Democrat of Georgia, who told the committee that the administration had not fully adhered to the law.

"It is my judgment that there has been an apparent violation of law," said Mr. Boland. "If you look at the stories that have come out of the stories that have come out of he said. "But I also won't stand there from reporters and members idly by and let Cuba and Russia who have gone down there, the evi-

dence is very strong."
Mr. Boland, whose committee has oversight on all intelligence operations, was the author of the ban on covert aid to guerrillas seeking to overthrow the Sandinist govern-

ment in Nicaragua.

The ban, which took the form of an amendment to an appropria-tions bill, was signed into law in December. It states that "none of the funds provided in this act may be used by the Central Intelligence Agency or the Department of Defense to furnish military equip-ment, military training or advice, or other support for military activities, to any group or individual, not part of the country's armed forces, for the purpose of overthrowing the government of Nicaragua or provoking a military exchange between Nicaragua and Honduras."

MEXICO CITY - Having moved quickly to tackle the acute economic crisis it inherited last December. Mexico's new government is now being criticized for failing to exert strong political leadership.

Labor and leftist groups have as-

serted that the poorest sectors of the population are carrying the main burden of the stiff economic austerity program. Last week, m-creases in the price of milk and gasoline brought fresh hardship for many Mexicans.

At the same time, businessmen and even some officials have complained privately that President Mignel de la Madrid Hurtado has been slow to address a mood of political uncertainty in the country.

Officials argue that the economic problems of four months ago were so severe that Mr. de la Madrid had little choice but to concentrate on the economy, slashing public spending and subsidies, raising rices and adopting other monetar ist policies required before new emergency loans would be made available from abroad.

These measures in turn deepened percent at a time when inflation is illicitly in office.

Madrid called last Friday for na-spoken out against what he de-tional unity during the crisis, not-scribes as a "witch-hunt," appar-ing that "national independence is only threatened when Mexicans are tire political system may be weak-

But he added: "Certainly, I can-

train that's going at 100 kilometers an hour because it will derail."

In political terms, the new presideut had the option of blaming the crisis on corruption and mismanagement during the administration of President José López Portillo. But Mr. de la Madrid has so far decided against such a move.

Many politicians here are puzzled by his reluctance. It is traditional for an incoming Mexican president to move quickly from un-der the shadow of his predecessor. And in this case Mr. Lopez Portillo's performance during his final year in office aroused the vocal animosity of the nation's middle

"Mexico is a country that needs strong leadership," a politician in the governing party said, "which is why every new president must break with the past. Until de la Madrid does so, he won't be his own man. And until he is seen to be in charge, confidence won't re-

THE PROPERTY OF THE PROPERTY O 

# Sour Notes on the TV

by Donal Henahan

EW YORK — Many people still watch televised orchestral concerts in hopes of enjoying a musical ex-perience as well as a visual one. Such trust is touching, but the truth is that the concert experience translates to the living room - or isn't it called the media room now adays? — about as successfully as a souffle would survive an ocean crossing.

Over the last 30 years or so, since I first saw symptony orchestras trying to squeeze them-selves onto my 7-inch screen, the technology-has been much refined. It once was necessary, to trim the orchestra down to chamber ensemble, cram the musicians into a studio soundstage and, by canny cropping of the pic-ture, merely simulate a concert-hall milion.

However, we now have performances filmed on the spot and almost with no physical re-strictions of any sort. In 1983, you would think, directors of these events should be able think, directors of these events should be anic-to capture the live performance with all its ceremonial and musical magic intact. And yet, at least for me, they are hardly more successful now than they were in television's dearning years. That this is not a basic failing of machinery or producing talent is proved every day by the success of televised sports — many sports fans much prefer the televised event to the live one, if only to enjoy the benefits of the commentary and the slow-motion instant re-

As far as I know, the instant replay has not been used by concert cameramen, although no doubt it has been suggested in production meetings. But intermission commentary can be and has been used to illuminate a televised performance and even the restless camera's eye can serve an educational function as it roves about, resting on various instruments as they contribute their individual sounds to the complex orchestral mix.

Still, while granting television these and other virtues. I have yet to watch an orchestral performance on television that moved or excited me more than marginally. The restrictions on enjoyment are musical and psychological, and probably inherent in the medium itself.

When I first began to complain about this W problem in point, I tended to think it traced to my peculiar situation as a music reviewer. After all, most people do not spend their lives immersed in and saturated by live performances. My reaction, however, is commoner than I once believed. After just about any televised orchestral performance, a few disappointed viewers feel it necessary to share their objections with me. What follows is an excerpt from a fairly typical letter written by Steven A. Herman of Washington, who tuned in the other evening, expecting to see and hear Beethoven's Nimth as performed by the New York Philharmonic under Zubin Mehra. Apparently he heard very little and saw too

The emphasis of the TV show was clearly not on giving the people in their homes an op-portunity to attend the concert and enjoy Beetboven's great symphony. Rather, the emphasis was singlemindedly and obsessively revealed to be the conductor and showing off how many camera angles they could find and use on the stage of Avery Fisher Hall. Thus, here was Mehta amiling; here was Mehta cajoling; here was Mehta gripping; here was Mehta being intense; and most of all, here was Mehta sweating. There were more close closeups of Zubin Mehta during this performance than of Bergman and Bogart in all of 'Casablanca.'
"Relief from Mehta was provided only when

the camera jumped to canvass the faces of the chorus or particular instruments in the orches tra. The important thing for the director, however, was that the camera not stay still. Jump, zoom and then jump again. God forbid that the camera might just stay still for a while. I finally closed my eyes. Next time I will leave the TV set off."

To some extent, televised opera shares these Problems, though in an attenuated form because opera is a bundling together of all the

Zubin Mehta.

arts and depends on visual effects for much of its success. In the past, I have been as highly skeptical about the future of televised opera as I remain about the televised concert, but opera is a hybrid art that can lend itself to television's purposes without fatally damaging its man makes clear in his letter, many music lis-teners have simply not evolved to the point of needing the vision of Mehra before their eyes as they try to listen to Beethoven.

" This is not Melita's fault." He is the of the more telegenic of maestros, so acceptable visually, in fact, that he has appeared on the cover of a gentleman's fashion magazine as one of the world's best-dressed men. If anyone can make the Beethoven Ninth pleasing to the eye,

Furthermore, the producers of the Beethoven Ninth program did not force the listener to hear the music only through the television set's puny speakers, but arranged to have it broad-cast simultaneously on FM. That is always a clear gain, especially for those who choose not

As it happened I both saw and heard Mehta and the Philharmonic performing the Ninth at the time it was being televised, from a seat in Avery Fisher Hall. I was annoyed, as usual, by the presence of television cameras, especially during the concert's first number, which had Emanuel Ax as soloist in Beethoven's Fantasy for Piano, Chorus and Orchestra. A cameraman, prominently seated about where one ordinarily sees the principal second violinist, continually panned between the pianist and the conductor, undoubtedly granting viewers

at home extremely intimate glimpses of Ax's fingernails and Mehta's glowing forchead.

For the Ninth itself, that camera was taken away but others in various parts of the stage and out in the hall apparently took over the close-up duties. All these supernumeraries with their machinery have become familiar sights at concerts, which does not make them any easier to accept unless you are such a child of our time that you accept anything committed in the name of television as natural and inevita-

But don't think I am complaining, Judging from Herman's letter, the Avery Fisher Hall audience got much the better of it.

I could watch Mehta, the orchestra, the four vocal soloists or the chorus - or even the camerainen — at my pleasure. I could read the program notes when the performance lost inerest for me. I could count the overhead lights. I could count the chorus members. When Mehta's generally faceless performance picked up at least a certain brutal vitality, as it did in the breakneck final pages, I could switch my attention to the music. And all without interrupting the performance's rhythm by periodically stepping out to the refrigerator, as is necessary when viewing a concert at home.

In fact, Herman and the rest of the television audience did not witness the same interpretation of the Ninth that I did on that evoning. They had Mehta's face to inspire them, while I had only his back. In Beethoven, as in all else, perspective can be everything.

# In the Solar King's Court

by Vicky Elliott

AMBURG - The clouds lie low over Hamburg, but somewhere underneath them, Peer Cruse is hoping for a bright future for solar energy.

He deals in pumps and panels and generators, and much smaller things too, and he dispatches them all over the world — anywhere there is sun, which, he says, includes even Hamburg. Last week he sent an explorer, Arved Puchs, to Greenland with a solar-powered satellite navigation system and a solar-powered transceiver for communication with his supply planes — the solar panels are light and easy to maintain, and normal batteries do not work below 40 degrees Centi-

Cruse says he thinks he has the largest range of solar-powered products in the world, more than 200 items in the photovoltaic line. He sis in his office not far from Hamburg University, large and welcoming and surrounded by a whirr of moving parts. There are spinning fans and turntables and toy bicycles in perpetnal motion, and not a battery in the

In the 19th century, one feels, all this would have been clockwork, and cuckoos would have been popping out of wooden boxes. But here all the geegaws of the consumer society, the calculators, the digital watches and the radio headsets, are fueled by photovoltaic cells that convert light into electricity. Some, such as "the new sensational, evenunder-electric-light-moving solar neon clip," start spinning when put under a light bulb.

"At noon at this latitude, even in cloudy conditions, the solar odle can charge up to 70 percent of capacity." Cruse explains, as the rain continues to pelt down outside. "Well," he admits, "we did have a very bad day today..." The new cells charge, he says, in light you can read a paper by. Some of his products work on direct contact with a light rce, others are linked to accumulators that can store energy.

He brings out a new first, a fluorescent light with two movable panels that soak up the sun during the day and can give back an hour's worth of light during the night. Like many of the products offered by Cruse's company — Suntronic, P.O. Box 605344, D-2 Hamburg — it is very useful for the camper, solving the problem of the battery that runs out

Cruse and his partner, a specialized engineer whom he met at a trade fair, cooperate on their own pet projects. They have produced a cooling box for use in cars or trucks (not as simple as it sounds, Cruse says), with a steel frame made in Italy and panels made in West Germany. Other refinements include a solar-powered oxygen tank they devised for fishermen friends to keep bait alive - and more appetizing for the fish -in the back of a car.

There is also a generator that uses a solar accumulator to power 5 kilometers of electric fencing (3 kilometers on a cloudy day) for disciplining wayward cows. Two solar cars with flat tops (they are, in fact, two-seater, four-wheel cycles) have been sold to clients from the Middle

East, but the price, which ranges from 12,000 to 20,000 Dentsche marks (about \$5,000 to \$8,250), hasn't encouraged anyone else.

The problem of technology hasn't altogether been solved yet. Solar cells still aren't cheap, though the U.S. space program and Solarex, and

at home, the West German AEG Telefunken, have been been improving on the originally brittle and rigid solar panels. One of Cruse's latest offerings is a flexible solar panel only 2 millimeters thick that can be let out on the hull of a yacht to power televisions, radios, friginaires and the like from a recharger battery (the 18-watt version, 32 by 78 centime-ters, costs 1,090 marks).

It was Cruse's own sailing boat that brought him inm the solar energy field 10 years ago. An economics graduate who worked in the Far East as a traveling representative for a Hamborg company, he set up his own business in 1975. Today he imports the latest in U.S. technology, and sends out pumps with West German panels and motors and U.S. casing. Smaller items, like the calculators and the musical boxes, are farmed our for production in the Far East.

or production in the Far East.

"I have in get the best price for every product and the cells are expensive," the 38-year-old Cruse says. A small cigarette lighter costs 25 marks, a mini-fan 80 marks, a wristwatch 373 marks. A recent variant on the solar pump, made in Hamburg, is a Garden Frog that costs 350 marks. If it is lowered into a garden tank, Cruse says, it "pumps water through the tent that spite it are again to freshen and filter it." This is through the tank, then spits it out again, to freshen and filter it." This is the kind of conceit that is fair game to the cheap imitation.

Cruse now knows what it means when a Japanese busin interest at a trade fair and buys up a healthy 50 samples. He patented a bicycle rider for the executive desk a few years ago, and 100,000 pedaled their way back into West Germany from Japan shortly afterward, shoddily made, but half the price. "For toys like that, that people lose inter-

est in, it's not worth taking anyone to court," he says. Solar energy for Cruse is not so much a business as a crusade. Each sale is a small moral victory for the cause that he is glad to he supporting through these difficult times. He used to have more competition, but most other companies went down in the last few years. "They didn't realize how difficult it is."

Cruse hasn't much time for the politics of the Greens, the amorphous

coalition of the alternative society whose supporters are thick on the ground in Hamburg. Cruse points out that the Green stickers in the windows of the houses down the street say Nein Dunke — No Thank You — to nuclear energy, but that his own sticker is more positive. It says "Hand in Hand With Solar Energy" and shows the earth and the sun in a smiling eternal waltz.

Greens apart, the general public, Cruse says, takes some convincing. "They think, why should I use solar energy when I can plug into the electricity in my house?" he says. Sometimes he is a little despairing about it. "Even if the price of a solar panel came down to 10 percent

they wouldn't buy it. The motivation is not there."

But he hasn't given up yet. "We'll just have to wait, because the time is working toward this kind of energy," he says, as a stuffed budgerigar in a revolving cage screeches maniacally in the background. Sometimes Cruse wishes he was just a little farther south. In Bavaria.

they tell him, they are using solar energy for their vacation houses in the mountains. "The more you come to the north, you can just cry," he

Not far away, in Schleswig-Holstein, they have been trying out propellers that transform wind energy. Apparently 600 or so propellers would produce the energy of a nuclear power station. But you need the

# The Bagel Baker of, Yes, Tokyo

by Terry Trucco

OKYO - In the mid-16th century, Portuguese explorers arrived here with what the Japanese deemed a strange and remarkable new food bread. During the last 300 years pan, as it is still called, has become so popular that today grocery stores and bakeries sell all varieties from wheat and white to pumpernickel and

But it wasn't until last September that Japan got to sample the bagel.

It is still too soon to tell whether these round, chewy rolls — a staple of the Jewish-American brunch — can gain the same devoted following in Japan as the English mulfin and the doughant, two other fairly recent arrivals. Nevertheless, Lyle Fox - founder, owner and baker of Fox Bagels, Japan's only bagel bakery — is bullish about bagels. "I feel like the first guy who brought pizza to Japan," says Fox, a tall, bearded man with a kisurely speaking style. "The biggest problem is educat-ing people. There are all these people here, and I've got to think up ways to get them to eat

So far the 32-year-old Chicago native isn't doing badly at all. Daily production, which now hovers at 600 bagels, has doubled since September and is growing steadily. The number of grocery stores, coffee shops, companies and chubs stocking Fox Bagels is growing too.
While it's no surprise that the bagels sell briskly at Tokyo's American Club, Foreign Press
Club and Jewish Center, Fox is particularly pleased that they are stocked by two promi-aent Tokyo grocery stores, including one with a big Japanese clientele.

"English muffins have infiltrated pretty well

here, but when a Japanese eats an English mulfin, it's not such a shock to the stomach," he says. "Still, I think everyone — well, almost everyone — who eats a bagel is a potential

customer for life." Such confidence is precisely what Fox has needed, since bringing bagels to Japan has proved no simple task. Japan is a nation that can dissuade both the small private en-trepreneur and the foreigner; while it takes rel-atively little capital to launch a new business here. Fox faced significant roadblocks, includ-

ing visa problems.
Once he moved to Tokyo in 1979, Fox's visa nabled him to work on the editorial staff of the Daily Yomiuri, an English-language newspaper. When he requested a change of occupa-don, the visa officers couldn't understand why he wanted to give up a good job with a large Japanese company to bake bread. They said to me. There are lots of bakeries around. Why do you want to bake bread?

He dutifully brought bagels for the visa officials to sample, but they replied that he lacked sufficient baking experience. Fox had, in fact, worked for a number of years in American restaurants. "But in Japan it's expected that you have 10 years' experience at something," he says. "It's like sushi chefs — they spend the first four years learning to sharpen a knife." Finally, ont of desperation, Fox compiled a

packet of landatory letters, including promises of orders from various businesses and even a declaration of the bagel's nutritional virtues by a dietitian. It worked. After three months of haggling, Fox was given permission to stay. The other pieces fell into place somewhat easier: Fox rented a small factory from his former landlord and purchased his freezer, oven

People have also been exceptionally kind, he says. From a baker down the street he received the all-important introduction to his chief sup-plier. And when his freezer compressor, which was too large to haul into the factory, needed a hood to protect it from rain, Fox's neighbor, a welder, insisted on making the cover and refusing payment.

and delivery truck second-hand.

Fox hopes eventually to hire someone to help bake and deliver, but for now Fox Bagels is literally a mom and pop operation, consist-ing of Fox and his wife Etsuko, whom he mar-

Lyle Fox and bagels.

ried last summer. Each morning they rise at 4 A.M., travel a short distance to the bakery and are fast at work by 5. The ovens must be heated, the bagels, prepared the previous day, de-frosted and the plastic selling bags labeled, dated and filled. Bagels sell in packages of 3

for 240 yen, just over \$1.

By 9 A.M., Fox is usually ready to begin deliveries and, until recently, when she quit to make bagels fulltime, Etsuko would leave for her job as a bookkeeper. After his rounds, which can take as long as two hours. Fox returns and makes the next day's dough. "We took 4 days off at New Year's, but otherwise it's been 14 hours a day, 7 days a week," he says, looking a little worn by midasternoon. "Etsuko's been wonderful." His Japanese wife had never tasted a bagel until just over a year ago, but she seems as optimistic about the business as her busband.

Fox's recipe, "a family secret," has been dapted to Japan with a few minor changes: He is thinking of adding a dried seaweed ver-sion. The line already includes onion, poppy seed, sessine seed, cinnamon raisin and plain. The bagels are a bit heavier than Fox would like, but he blames his flour, not his recipe. "I use American and Canadian flour, but due to import quotas I still can't get the exact type I want," he says.

Over a plate of moodles at a nearby restanrant, Fox admits that he originally set out to write fiction, something he would like to get back to if his business ever eases up. He won a writer's fellowship, enabling him to spend several months on Cape Cod, Massachusetts, afgraduation from Ohio's Miami University

But ever since high school, when he be-friended a Japanese exchange student, Japan has fascinated him. He studied the language briefly in college, and later toyed with joining the U.S. Army to learn it better. A compr sive one-year Japanese course at Cornell University provided a more-attractive alternative and afterward Fox set out for Tokyo, where he has lived ever since.

"I'm still a student of Japanese culture." he says. "In dealing with the Japanese you've got to be sharp. You've got to be able to read sig-nals a potential customer gives. He won't come out and say things directly. This is where all my training will either pay off or not. It's an invisible trade barrier. The Japanese say, We've learned your language so we can do business with you. Now you learn our language so you can do business with us. But it's not that easy. I have learned the language, and it's not always enough.

Still Fox insists he's in for the long haul. His immediate goal is to raise production to 1,000 bagels a days, the amount his ovens can hold. He also looks forward to the day when he might open a restaurant to go with the bagel business. Ethnic restaurants do well in Japan and Fox thinks there is a market next for chopped liver and kosher dill pickles - made

# Keeper of the Hitchcock Flame

by Nancy Mills

OS ANGELES - When Alfred Hitchcock died in 1980, he left a vast film legacy. And he left it all over Hollywood. It seems as though nearly everybody here owns the rights to at least one Hitchcock picture.

Keeping track of the Hitchcock legacy is so difficult that even his beir — his daughter, who owns just 5 Hinchcock frims — isn't quite sure who controls the 48 others.

Sitting in her home one recent morning, Pa-tricia Hitchcock O'Connell was considering the latest takeoff of her father's work — Universal's "Psycho II." "I don't see why they shouldn't make a "Psycho' sequel," O'Connell says. "I'm sure they're
trying to be faithful. Anyway, I can't stop
them. They've already remade "Shadow of a
Doubt' ["Step Down To Terror," 1958]. I
didn't think that was very good."

The only child of Alfred and Alma Reville Hitchcock, O'Connell, now in her mid-50s, grew up on Hitchcock film sets. She became an actress at 13 and retired two years ago "be-cause it wasn't fun any more." She and her husband live in a comfortable one-story home in Woodland Hills, a Los Angeles suburb. The major hen to the Hischook fortune (her three daughters inherited trust funds). O'Connell spends much of her time dealing with matters concerning her late parents' estates. She is, of

course, an expert on her father's work. A onetime movie buff, she says she hasn't seen a film in a year. "It's too had there isn't more imagination," she observes of the Hollywood vogue for making seenels. "On the other hand, copying is the greatest form of flattery. No material is sacred, it's what you do with it that's important. You give nine people the same material, and they'll come up with most

ways of doing it. "It's very unusual for a remake ever to come up to the original, even if it's made by the same person. I'm not disparaging anyone doing a remake. My father only remade one picture. The Man Who Knew Too Mach, and he was very nervous about doing it. Critics still argue about which version is better.

"My father's main purpose was to entertain.

be anything fantastic — and with the writing make something of it.

"He used to talk about 'sink-to-sink' movies. He'd say. A woman finishes getting dinner, does the dishes, goes to a movie and there's somebody else doing the dishes. People don't want to see that. They want to be taken out of their life a little bit."

O'Connell is full of stories about her father but has no plans for any "Picase Don't Scare Me, Daddy!" books. The Hitchcocks were a right-knit family, she says. "My father's relationship with me was totally normal," she em-phasizes. "It sounds odd when you know all about his movies. I admit, he did like to scare me. I remember him taking me on roller coast-

ers. To this day I have a fear of heights." She chuckles. O'Connell is short and jolly, and she's beginning to develop the famous Hirchcock double chin.

"On Saturdays my father used to take me shopping for clothes. I didn't necessarily like all the things he picked out, but they were al-

Even after she grew up her father still tended to dominate her, she recalls. "I remember ning me to go over to their house on Sandays. He'd pull the guilt thing on me: Do you mean to say," she imitates in the slow, measured tones of Hitchcock's voice, "that you would rather be there than with your mother and me? Your mother and I sit here ... That's what he'd do. I can laugh about it now, but it wasn't too furmy at the time."

O'Connell grew up out of the limelight, she says, "because my father didn't really become famous - to the extent that he was recognized until the TV shows, and by then I was already married. The only thing that sticks out in my mind was a threat made about one of Bing Crosby's sons. The idea of kidnsoping used to scare me. I hated being alone in that house. That's one reason I don't want to move

into my parents' house now." The Hitchcock family home, which over-looks the 15th fairway of the Rel-Air Country Club, has been on the market for \$1.9 million. The Hitchcocks lived in it from 1942 until his

widow died last year. "I really don't want to live in their house,"

He could take a slight story — it didn't have to be anything fantastic — and with the writing make something of it.

O'Council admits. "My husband and f have our life here." She says "nothing has changed" since she inherited her father's millions. "It could change for some people, but it wouldn't for us. I think my father taught me to be levelheaded. You see so many people with a tre-mendous amount of money who aren't really

> "I think you have to have gone through periods in your life when you've had no money at all to appreciate an inheritance. Otherwise you don't think anything of it. You go hog wild, f remember when we were first married and liv ing in New York, my husband was making \$34 a week. When he had his first heart surgery about eight years ago, we didn't have any in-surance. That absolutely cleans you out."

Turning to her own film career, she says with a langh, "My father didn't believe in nepotism at all, unfortunately. I could have had more parts if he had." She appeared in three Hitchcock films — "Stage Fright," "Strangers on a Train" and "Psycho" — and immunerable "Alfred Hitchcock Presents" television shows.

"If I was exactly right for a part, fine, but if I wanted a certain part I wouldn't get it. He was strictly professional. Once he knew I wanted to become an actress his words to me were, Learn your craft. Know what you're doing. Know every single thing about it.

That's why I went to the Royal Academy of Dramatic Art rather than any, shall we say, in-depth actors' schools. He wasn't for that at all. Well. it's an uncontrolled way of acting, and he didn't like anything to be out of control. He liked to control people." During his lifetime Hitchcock saved every

bit of paper related to his work and stored it in hauge filing cabinets. Nothing can be done about his papers for a couple of years, until the estate is finally settled." O'Connell explains. However, whatever we intend doing the main thing is for students to have access to the files. If they're given to one place then I want copies made and given to some universities on the East Coast and in England. It doesn't mat-

ter what it costs to do it. I would incur the

costs. The way my father made films and all

those notes -that, I feel, is his legacy."

# Restaurants: On the Cheap

#### by Patricia Wells

ARIS - We've all been there. You're looking for a good restaurant, not 100 expensive, conveniently located, where you can eat for about 100 to 150 francs (about \$15 to \$20) a person.
When you smugly selected the bargain 100-frane menu, you failed to note that wine and service were not included, you find the wine list offers nothing but undrinkable plonk and overpriced Bordeaux grands crus, and by the time you've taken your last sip of espresso (not included on the fixed-price menu), you've spent 200 francs a person. Quickly, you learn that cheap is not cheap.

Paris does, of course, offer dozens of inexpensive restaurants, but it

takes some searching to weed out the good from the bad, the real from the false bargain.

Here are a few, representing a range of cuisines, decor and prices. Depending on your appetite and taste in wine, the following should cost 100 to 130 francs a person, including a first course, main course, cheese or dessert, coffee and a half a bottle of moderately priced wine. At a few, you may get by for 60 francs, if you're willing to go for carafe wines

La Lozère, half-restaurant, half-tourist office, represents the hearty cuisine of the Lozère region in central France. The decor is simple and rustic, and diners sit elbow to elbow at the five bare wooden tables. slicing their own bread from hefty loaves of pain de campagne that are

brought up from the Lozère twice a week.

The clientele is a mix of young workers looking for a good, bargain meal, and well-fed, old-time Parisians who bring their newspapers or their wives to feast on fresh omelets, salty jambon cru and the filling, meaty plot du jour. There's always soup, salad and good fresh regional cheeses, such as the nutty, smooth-textured Cantal and the piquant.

farm-ripened Bleu d'Auvergne. Good bets here are the salade aux lardons tossed with chunks of warm Cantal, the daily special côtes d'agneau, served with good pan-fried potatoes, and the fromage blanc mounded with berries. The wine list is simple, and includes a reliable 1980 Cahors, Saint Didier, at 38 francs a

Pile on Face is an elegant little restaurant recently transformed from a grubby corner cafe near the Bourse. It's already attracting the solidly hungry crowd from the Stock Exchange by day and loyal local residents

It's the kind of place to go for a serious business meeting or a romantic dinner for two, for the decor is refined and intimate, service attentively correct, and the classical music soothing. Reserve one of the upstairs tables, where the tiny dining room has the air of an English country home and fresh, appealing desserts are set out on a sideboard so you can spend your dinner hour deciding which you'll give in lo.

The food here borders on nouvelle, but is neither exotic nor con-

trived, and the chef has worked out a compact, pleasant menu based on high quality, inexpensive varieties of meats and fish and poultry. The bright-faced, preppy staff is happy to make suggestions on both food and wine.

The best dishes sampled recently include a salad of the freshest mushrooms thinly sliced, tossed in a good vinaigrette and showered with fresh herbs; a salade frisee served with extraordinarily good grilled Saint Marcellin cheese, and a subtly seasoned rabbit with fresh rosemary. Desserts are above average, and on a given day may include a respect-able marquise ou chocolat and mouth-puckering lemon pie. The little petits fours offered with coffee are less successful. The dry white Doisy-

Daëne, 1980 vintage, is a good choice at 49 francs a bottle. . Chez Jenny, the buge Alsatian brasserie just off Place de la République, may not serve the best choucroute in town, but it's certainly in the running for first place. From the exterior, the gigantic, wood-paneled dining room looks like any ordinary brasserie, but step inside and you'll instantly be transported to Alsace, land of chilled white Riesling, pork and choucroute. Matronly waitresses are dressed in period costumes, all the hearty regional dishes are served up on giant copper platters, and service is swift, open and friendly.

Perhaps best of all, you can dine well here for less than 65 francs a person, selecting the copious choucrouse paysanne (which includes expertly cured grilled slab bacon, well-seasoned bratwurs) and frankfursers and fresh palette of pork) washed down with a dependable house Riesling at 12.50 francs for a 25-centiliter carafe. Late diners should note that the restaurant is open until I A.M.

Other house specialties, all moderately priced, include grilled saddle of lamb, coq au vin and a hefty jarret de porc garnished with sauerkraut. Forgel about the waterlogged, tasteless chaucroute aux trois boudens de poissons, a fish dish that's an insult to choucroute lovers, Alsatian or otherwise.

For a good, reasonably priced meal near Les Halles, one can't do better than the reputable Au Cochon d'Or, a small, friendly restaurant specializing in great cuts of beef, grilled andouillette, or tripe sausage.

and classic bistro fare.

The 1930s decor is fresb and sparkling with smiling, gray-haired women in crisp black and white attending with a professional air. What's more, the bread is crisp, the fries fresh and golden, and the wine list includes some commendable Beaujolais and minor Bordeautor.

Begin with the fricassee d'escargots aux girolles, a full-flavored, filling starter that blends deliciously rich snails with wild mushrooms in a starter that biends deuciously rich shalls with wild musticoms in a buttery sance perfect for dipping the crusty bread. Then move on to the famed grilled beef (or kidneys, or entrecote, or even grilled pork with garlic), served with a pleasant shallot butter. You'd do better to stay away from the larte Tatin dessert - swimming in butter and not up to par - but after fare such as this, who has room anyway?

Polidor, with its little lace curtains. Art Deco light fixtures and fresh home cooking, is a lively bistro that's aged with grace and charm. It is probably in every jourist guide known to man, but go anyway. A meal here shouldn't cost any more than 80 francs a person, and those on a

very tight budget could get by for less. Order the piping hot snails (28 francs a dozen) and the waitress breaks into a wide grin of approval and tells you that the snails are de la maison — not plucked from a plastic freezer bag — so you'll have to wait a few minutes. Here, a few minutes mean two maybe three.

Regulars - well-dressed businessmen who come alone and write notes to themselves on the paper tablecloths, which seem to be designed expressly for doodling — don't even bother with the menu, just wail for the waitress to tell them what's good and fresh that day.

A steak and french fries cost 20 francs, pumpkin soup 10 francs, and a generous serving of well-spiced champignons o la grecque is also priced at 10 francs. Do try the garlicky, buttery snails, the moist, succulent pintadeau, or guines fowl, served with fresh curly green cabhage, or the saddle of lamb, with deliciously warming flageolet beans. The bread is crisp, the wine selection decent, and the tarte Tatin is prepared authentically with huge chunks of apples, though it was overcaramelized and slightly bitter on a recent try.

La Lozère, 4 Rue Hannefeuille, Paris 6: tel: 354.26.64. Closed Sunday, Monday and August. Menus at 51 and 61 francs, not including wine and service, and 78 francs, including wine and service. A la carte, about 106 francs o person, including wine and service. No credit cards. Reservations

Pile ou Face, 52 bis Rue Natre Dame des Victoires, Paris 2: tel. 233.64,33. Closed Saturday and Sunday. No credit cards. About 130 franc.

Chez Jenny, 39 Boulevard du Temple, Paris 3; tel: 274.75.75. Oper daily until 1 A.M. 75-franc menu, not including wine and service. A la carte, 75 to 100 francs o person.

Au Cochon d'Or. 31 Rue du Jour, Paris 1; tel: 236.38.31. Closed Saturday lunch and Sunday. Credit cards; American Express and Visa. 82-franc menu, including wine but not service. About 100 francs o person. Polidor, 41 Rue Monsieur le Prince, Paris 6; tel: 326.95.34. Clased

# SOUTH EASTASIA A FORTY WIN

Though we can't shorten the flight, we can do a lot to shorten the time it seems to take.

Our first class offers 18 luxurious skysleepers where you can stretch out completely, yet still leave room for other passengers to pass without disturbance.

And when you wish to work quietly, you can use our special in-flight conference lounge.

Our business class is not separated from tourist class by a mere curtain. It comprises the complete upperdeck, with its own cabin attendants, galley and bar. So the business passenger gets the extra comfort he expects.

No wonder our passengers tend to spend a lot of time dozing and slumbering.

But when you're awake, you can count on the warm courtesy you'd expect from our Indonesian stewardesses.

It isn't easy to turn a long distance flight into a 'dream trip', but we certainly do our best to help you dream the miles away.

**GARUDA.WHERE EVEN TIME FLIES.** 

# **Swede and Sour**

#### by Craig Claiborne

T EW YORK - Swedish food has long been a particular favorite of mine. I love herring dishes and Swedish pea soup and pancakes and a dish called Jansson's Temptation, and I consider well-made Swedish meatballs one of the great regional specialties of the world.

So when an acquaintance recently told me that an Elisabeth Thorstensson, a native of Sweden who lives in New York, makes what be considers the best Swedish meatballs he'd ever eaten. I quickly invited Thorstensson to cook in my kitchen. She modestly disputed the claims of my friend but agreed to come any-

way.

She also agreed to create two dishes with which I was totally unfamiliar, boiled year with warf. a sweet and sour dill sauce and seaman's beef. country-style dish of beef with potatoes. In addition. Thorstensson prepared a cucumber salad. Jansson's Temptation and pancakes with eloudberries. Her visit turned out to be something of an

education for me. I learned, for example, that koubullar, as meatballs are known in Sweden, are not flavored with dill either in the meat or in the sauce. That, Thorstensson said emphatically, is German.

How does her meatball recipe differ from others? She can't explain it. There are as many recipes for those meat-

balls in Sweden as there are for clam chowder over here," she said. "There must be at least 500 versions and more. I do not use dill, but only a touch of thyme in mine." Perhaps, she added, it has something to do with the texture. which is partly achieved by her use of club soda and cream in the ingredients. Whatever the difference, her meatballs lived up to their advance billing.

Thorstensson, who was born in the town of

Stugun in northern Sweden, came to the Unit-ed States about 17 years ago. Before that, she said, she had never cooked for a living. But she found almost immediately that there was a good deal of interest in authentic Swedish cookery, and she quickly made her way as a

#### SWEDISH MEATBALLS

2 pounds ground top round of beef 1 cup fine fresh bread crumbs 1 cup plus 2 tablespoons heavy cream 4: cup finely grated onion Salt to taste if desired Freshly ground pepper to taste egg yolks

1/2 cup club sods 1/2 teaspoon dried thyme 1% cups fresh or canned beef broth I tablespoon red current jelly.

1. Put the beef in a bowl and set aside. 2. Blend the bread crumbs and one cup of cream, and let stand half an hour or longer. Blend the meat and the crumb mixture and add the outon, salt, pepper and egg yolks. Sur to blend well.

3. Add the soda water and thyme and blend thoroughly.

4. Shape the meat into 48 to 56 meathalls, each about 14 inches thick.

5. Heat the butter in a large, heavy skillet and add the meatballs a few at a time. Do not crowd them. Cook until seared on one side. Cook, turning, until browned on all sides, and transfer to a dish. Continue cooking until all the meatballs are browned.

6. Pour off the fat from the skillet. Add the flour and stir with a wire whisk. Gradually add the broth, stirring rapidly with the whisk. Stir in the jelly until it melts. Add the remaining cream and stir.

7. Return the meathalls to the skiller with the sauce and reheat gently. Yield: 8 or more servings.

#### JANSSON'S TEMPTATION

5 or 6 baking potatoes, about 2 pound 1 can, 3½ ounces, anchory fillets or sprats 1½ cups thinly sliced onions Freshly ground pepper to taste

Preheat the oven to 375 degrees.

Peel the potatoes and cut them into 1/4inch-thick slices. Stack the slices and cut them into 1/4-ineh-thick strips to resemble french fries. There should be about eight cups.

3. Cover the bottom of a baking dish (an oval dish measuring 13 by 8 by 2 inches is ideal) with half of the strips. Drain the anchovies, reserving the liquid, and arrange them symmetrically over the potato layer. Pour the reserved liquid evenly over all.

4. Scatter the onions and pepper over the top, and then scatter the rema over them. Pour the cream over and sprinkle with pepper.

5. Place in the oven and bake 45 minutes to one hour, until potatoes are done. Yield: 8 or more servings.

#### **BOILED VEAL** WITH SWEET AND SOUR DILL SAUCE.

ider of yeal, 3½ pounds, tied 6 cups water, approximately Sait to taste if desired

20 peppercorns 2 ribs celery, trimmed and cut into 2-inch

2 large carrots, trimmed and cut into 2-inch lengths I onion, about ½ pound, trimmed

tablespoons butter 3 tablespoons flour % cup sweet and sour dill sauce (see recipe) 2 tablespoons heavy cream

2 tablespoons heavy cream 3 tablespoons finely chopped (resh dill. I. Put the veal in a kettle and add the water

ing the surface often to remove all fat and Add salt, peppercoms, celery, carrots and onion. Cover tightly and let simmer 40 to 45 minutes or until meat is tender. Remove from the heat and lel stand, uncovered, until ready

to barely cover. Partly cover with a lid and

bring to a boil. Let simmer 10 minutes, skimm-

3. Transfer the meat to a warm platter. Strain the cooking liquid; there should be about six cups. Discard solids. Reserve 24: cups of liquid for the sauce: the remaining ho-uid may be used for soups or other sauces, if

4. Heat the butter in a large saucepan and add the flour, stirring with a wire whisk. When blended, add the reserved 21/2 cups of cooking liquid, stirring rapidly with the whisk.

5. Add the sweet and sour dill sauce and the cream to the sauce. Stir in the dill and serve the sauce with the hot sliced yeal. Yield: 8 or more servings.

#### SWEET AND SOUR DILL SAUCE

1 cup coarsely chopped, loosely packed dill, stems included ½ cup white vinegar 4 cup sugar.

I. Put the dill in a small saucepan and add the vinegar and sugar. Bring to a boil and let simmer about 30 minutes.

Yield: About 4 cup. ©1983 The New York Times

# Into Town by Native Bearer

by Stanley Carr

EW YORK - When Air France introduced its Caravelle jet service from Paris to London 24 years ago it could boast that the flight from capital to capital took less time than the journey from the airport to central London. The same is true today, if you take a taxi in the rush hour. But by taking advantage of the latest extension of the London Underground, the trip can be completed in the latest extension of the London Underground, the trip can be completed. in about 40 minutes, and in relative comfort. (The city-to-city flight takes around 50 minutes.)

The transfer from airport to downtown — no matter which city — often seems puzzling. Many passengers find the convenience of settling back into a taxi at the end of a tiring flight difficult to resist, especially if they are carrying heavy luggage. But passengers who are traveling light (and do not intend to rent a car) can usually save money, if not time, by using the other options for getting into town, and back to the

The options can also be the answer to long lines for taxis. Another advantage — for the vacationer at least — is that by taking the bus or train that local people ride they are plunged immediately into the daily life of the country.

Following are examples of the options at some major airports:

LONDON — At Heathrow, if your luggage is not too bulky, the best bet is to take the London Underground from Heathrow Central station, which can be done without having to go outside. Take a cart at the luggage carousel for your bags, walk down a ramp and through a couple of triangle streight to the submant ficket of the tunnels straight to the subway ticket office.

If you have the correct change you can buy your ticket from one of the machines and avoid a line. The cost varies according to destination but to Piccadilly it is £2,20 (roughly \$3,30). Luggage carts are left at the top of the escalator leading to the train platform. Trains are clean and frequent, but they fill up with shoppers and commuters at the 18 stops to Piccadilly, so it is best to keep your luggage close at hand and out of the way of other passengers. It will take about 35 minutes to get to Piccadilly

The London Transport (double-decker) express bus leaves each of the airport's terminals at 20-minute intervals between 6:40 A.M. and 8:40 P.M. It costs £2, half price for children, and drops passengers at Victoria or Paddington train stations. The ride takes about 45 minutes longer during rush hours. Another bus, the Green Line, leaves the Central Bus Station at the airport every half boor until 7:30 P.M., and then on the half hour at 8:30, 9:30 and 10:30. It costs about £1.50, children half price, and makes several stops on the way to Victoria, so it's slower. Figure an hour and a quarter. For a taxi, the fare is between £12 and £15, plus a 10 percent tip.

At Gatwick Airport, about 30 miles south of London, the thing to do is to walk into the adjacent British Rail train station. Departures for London's Victoria station are every 15 minutes until midnight and once an hour after that. There are a few stops on route and the journey takes about 45 minutes. The cost is £3, with children under 14 half price. There's also an express bus to Victoria that runs every half hour from 6:30 A.M. until 8 P.M., and then on the hour at 9, 10 and 11. Fare: £2,

PARIS — Depending on their airline, passengers arrive at either Roissy-Charles de Gaulle Airport or Orly, At Roissy, the Air France coaches (available to all passengers) run every 5 to 15 minutes, depending on the time of day, into the Porte Maillot terminal near the Arc de Triomphe for 25 francs (about \$3,50). The ride normally takes about 25 minutes but can stretch to 40 minutes in rush hour.

For Roissy passengers wishing to take a train into the Gare du Nord, with its easy access to the Metro, or subway, there is a free shuttle bus every five minutes to the Roissy train station, a five-minute ride. Non-stop trains into Paris leave every 15 minutes until 11:30 P.M.; the ride takes about 30 minutes and costs 18 francs. Taxis cost from 80 to 140 francs, depending on destination and time of day.

From Orly, Air France buses leave every 15 minutes, and the ride to

the Invalides takes from 20 to 40 minutes depending on traffic. The fare is 24 francs.

Unlike the shuttle at Roissy, the bus connecting Orly to the Orly rail station, a mile away, is not free. You pay 14 francs for the bus and train journey as you board the bus. Trains leave every 15 minutes, from 5:30 A.M. to 9 P.M., every 30 minutes from 9 to 11 P.M. Destinations include the Quai d'Orsay, Saint-Michel and Australitz stations, from each of which you can make Metro connections. The ride takes about 40 minutes. Taxis are about the same as from De Gaulle — 80 to 140 NEW YORK — The Carey bus offers the simplest route from Kennedy Airport to Manhattan. It runs nonstop from Kennedy to the East Side Airlines Terminal at 37th Street and First Avenue and costs \$6.

The service operates about every half-hour from 5:30 A.M. to 1:10
A.M., and the trip takes 45 minutes to an hour, depending on traffic.

By public transportation, the much-heralded JFK Express (train) from the airport to the city is still underused. To connect with the express, there's a free shnttle bus to the Howard Beach subway station. where it begins. The train, with a transit policeman aboard, makes one stop in Brooklyn and six in Manhattan, the last being 57th Street at Sixth Avenue, and the fare is \$5. Total traveling time is from 55 to 65 minutes, and service is available from 5:30 A.M. to 12:30 A.M. A taxi is

From La Guardia Airport, which is closer to the city than Kennedy, the Carey bus runs nonstop to Grand Central Station at Park Avenue and 42d Street. The fare is \$4.50. The bus leaves every 20 minute to half an hour from 6 A.M. to midnight and the trip takes about 30 minutes.

By public transportation from La Guardia, the route is a Q33 bns to Roosevelt Avenue subway station, then either the P train on the Sixth Avenue line or the E train on the Eighth Avenue line. Both bus and subway offer 24-hour service, but there are 30- to 60-minute intervals at night and on weekends. Both bus and subway cost 75 cents each. A taxi

ROME — The Fiumicino airport is 25 miles outside the city and a taxi will cost around 40,000 lire (about \$28). A far-better proposition is the blue airport bus that leaves every 15 minutes or so and runs nonstop to the central Termini station, a ride of about 45 minutes. Buy your ticket, at 3,500 lire, at the booth inside the airport terminal; the buses are just outside. (The planned extension of the city subway to the airport may be completed in 1984.)

FRANKFURT — The bus that used to serve the airport has been

replaced by a train that starts from underneath the sirport terminal and continues at ground level to the city's central train station six miles away. Riding time is about 15 minutes. Passengers buy their 3.40 Deutsche mark (about \$2) tickets from a vending machine and need-

case change.

The trains, clean and comfortable, and with roomy luggage racks, leave every 15 minutes. A Mercedes taxi will make the trip in 20 minutes for about 25 marks plus 10 percent tip.

DUBLIN — Only passengers on Aer Lingus, the Irish airline, fly directly to the Dublin airport. Other airlines put down at Shannon, which is 138 miles southwest of the capital, and their passengers must change to a local Aer Lingus light to complete the journey by air. At the Dublin airport coaches leave every 20 minutes for the Busarus bus station on Store Street in the city. The 35-minute ride costs about £2.50 (about \$3.50), children half price; you pay on the bus. A taxi ride into midtown will cost around £7 plus 10 percent tip.

To get from Shannon to the Dublin surport by rail, take a local bus to

the station at nearby Limerick and board the Dublin train. The buses leave for Limerick about every 20 minutes, and the fare is around £2; there are five trains a day, from 8:44 A.M. to 6:50 P.M. The train takes about two hours. Fare: £16, children half price.

MEXICO CITY - The subway connection from the airport to downtown should be in operation within a year. In the meantime the traveler has the choice of a 44-passenger coach for the peso equivalent of \$2 or a six-seater station wagon called a Setta for \$3. The buses run every 15 minutes at peak times and in other periods every half hour or once an hour until midnight; Settas are almost always available. Both the buses at \$2.50 to \$4.50 to \$ and Settas drop off at the major city hotels, and most trips take 25 to 40 miuntes. Taxis charge about \$5, plus a 10 to 15 percent tip, and can

usually get downtown in 20 minutes.

TOKYO — From the Narita airport, which is 42 miles from downtown, the taxi ride—at about 15,000 yen (around \$60)—is scarcely an advantage. The limousine bus service, which can be picked up at three airport stops, gets to the City Air Terminal in about 70 minutes, the same time most taxis take; recently the service was expanded to include most major downtown hotels. Fares are 2,400 yea to the air terminal or the Palace or Ginza Tokyu Hotels, \$10.40 to the New Otani or the

Tickets are purchased at counters outside the airport customs area; departures are every 5 to 10 minutes. Narita also has a train station with nonstop service on the Keisei line to Tokyo's Ueno station, but you must take a three-minute shuttle bus ride, 130 yen, to the station, then walk down a flight of steps. The Skyliner, as the train is called, leaves every 30 minutes and gets into town in an hour. The fare is upward of

# Shopping: Cameras in Barcelona

by Jack Manning

ARCELONA - Casa Arpi, a modest-looking camera shop in Barcelona, is situated on the Ramblas, one of the liveliest pedestrian tho-roughfares in the world, just a few steps from the spot where Christopher Columbus was greeted by King Ferdinand and Queen Isabella on his return from the New World. An unobtrusive exterior gives no hint of the tremen-dous volume of business and variety of merchandise that elevate Casa Arpi into a small group of world-class camera stores.

Entering the store is akin to walking into the Delegates' Lounge at the United Nations. The languages that fill the sir are as varied as the dress and features of the customers: French, Italians, English, Scandinavians, Germans, Americans and, of course, Spaniards. The mul-tilingual sales staff is quick to share tips on the best buys in cameras as well as what to photograph in Barcelona and where to have lunch.

The physical dimensions of the store are misleading. Like an iceberg, much of it is below the surface. At street level there is a small selling area with several counters. In one corner a tiny spiral stairway just wide enough for one person curves upward to a larger selling space on the second floor. Here, illuminated glass showcases filled with new and used cameras line the walis.

Minolta. There are sub-compact, medium-format and large studio cameras; macro lenses that can zero in on the eye of a bee and giant telephotos capable of capturing the flight of a space shuttle: flash units barely able to light a of color films — increasing its speed from 100

small room and giant powerhouse lights that will easily flood a buildight arena with thou-sands of watt-seconds of illumination.

There is a museum-quality collection of photographic memorabilia. It includes old-fashioned view cameras beautifully finished in mahogany and polished brass, stereo cameras and viewers that were popular in the "Gay Nine-tics," and some early Leica cameras that launched 35-millimeter photography more than half a century ago.

The completeness and variety of stock has made Casa Arpi a "must" stop for photogra-phers from all parts of the world. For example, near- and far-sighted photographers who have difficulty focusing their cameras will find corrective eyepieces for virtually every make and model. Cameras requiring batteries can be supplied from stock

Out of film? Drop into the film department and make your choice from such familiar names as Kodak, Ilford and Fuji, or lesser-known brands like Ferrania from Italy or Own

Excellent film processing is another reason for the store's popularity. Its off-premises facilities, surgically clean and highly computer-ized, turn out thousands of color prints each day, and careful quality control insures results that rival the output of the finest labs anywhere. Delivery takes from 24 to 48 hours, and if you should have to move on before the film All the familiar names may be found here: is ready, Arpi will mail the prints to your next Canon, Nikon, Linhof, Hasselblad, Pentax, destination or home address. In these days of cumulative X-ray examination of loggage with the attendant dangers of harmful logging of

to 200 ASA or 400 to 800 ASA - is a handy service Arpi offers those taking pictures in dimly in churches or museums.

Traveling in vibrating planes or jouncing over rough roads may affect the delicate mechanisms of many cameras. For photographers passing through, repairs can be done in reasonably short time. A separate section of this department will also help modify your equipment to your special needs. For example, I had the lens of one camera fitted to another with excellent results, and even had a camera of my own design built, in part. The quality of the workmanship is high and prices considerably lower than in the rest of Europe and the Unit-

Two levels of the store never meet the customer's eye. Both are enormous storerooms below street level with floor-to-ceiling shelves stretching 40 and 50 feet. It takes a computer working full time to track down merchandise and fill the thousands of orders that pour in

from Spain and abroad.

Why is one of the world's great camera stores situated in Barcelona? The answer might lie in the fact that the population of Spain's most cosmopolitan city is close to three million, and practically all of the inhabitants seem to be clicking away at each other on weekends. While the toprists are photographing the sights, the residents are busily snapping pic-tures of their families and friends. This accounts in part for the many busy camera stores in the city, but Casa Arpi is the busiest of all.

So, while meandering along the Rambla, with its stands purveying birds, flowers and pets, drop into 40 Rambla de los Capuchinos (tel: 301.74.04) for a close-up of a great camera

# Taking the Waters of Youth

by Charles Hillinger

TOUNTAIN OF YOUTH, California - Two thousand elderly men and women camping out in trailers clustered around four outdoor hot mineral baths have been following news of this winter's American blizzards with keen interest. "If I had remained in Detroit and suffered through the cold and snow, I would have croaked years ago," mused 83-year-old Rex Lask, a Fountain of Youth regular for the last 15 winters. Lask was relaxing in a hot pool with a couple of dozen other old-timers.

"What's the average age of people camped out here?" Walter H. Schroeder, 85, a Michigan farmer, was asked. He laughed and re-plied: "98." Actually it is 77.

"Don't let people know where we are. There are too many here already." chimed in Johanna Hallstrom, 70, of Penhold, Alberta in Canada. "Penhold is the birthplace of winter. We're here escaping the subzero temperatures," she said as she relaxed in a hot pool.

Estructure of Yorth is in a present agent of

Fountain of Youth is in a remote area of desert at the foot of the Chocolate Mountains, 44 miles south of Indio, in the southern part of California toward the Imperial Valley.

"It takes a guide to find the place," said
Rhea Green, 73, a refugee from Cut Bank, Montana, consistently one of the coldest spots in the United States. Temperatures of 40 to 50

degrees below zero are common there.

The campers play pool by the hour in a recreation hall, pitch horseshoes and roar across open desert on dirt bikes. Women chai at the camp beauty shop, at sewing circles and in

After dark, Fountain of Youth bristles with bingo parties, square dances and amateur hours where the old folks swap jokes, play musical instruments and sing in harmony. Pinochle, table tennis and painting are other pas-

"I call this the Baden-Baden of the desert," said Brono Albrecht, 70, a recent immigrant from West Berlin.

"Every month we are a day younger than we were the previous month. We don't think of getting old. We think of getting young. That's why we call it Fountain of Youth," said Anna Lucka, 72, a masseuse who formerly lived in Germantown, Illinois. She specializes in Ep-

som-salt-and-mineral-water massages.

Fountain of Youth is a private spa with room for 1,000 trailers, and it is filled practically every day during winter. Its location is passed along by word of mouth, so do not bother locking to a press. bother looking on a map.

Waits for camping space often range from a

few days 10 a couple of weeks. The fee is \$9.50 a night, with electrical, sewer and water hookups provided. There is daily mail delivery via the Niland (ZIP 92257) post office.

In winter, Fountain of Youth is senior-ciozen city on the barren salt flats. In summer it's

# 'Miracle Spring' Floods a German Village

ANSCHBACH, West Germany -Since a mass-circulation newspaper wrote in February of a "miracle cure" here, more than 200,000 people have descended on this village to test the powers of its spring water. But no new cures have been recorded since the Bild Zeitung re-

ported that a teenage Ranschbach boy re-gained his sight two years ago after drinking water from the Kaltenbrunn, or cool spring, .-With only 620 inhabitants, this village at the. foot of the Haardt Mountains near the French border has been swamped by pilgrims from all over the country. Urgent changes were neces-sary to prevent the crowds from trampling the

quiet chestnut grove around the old wellhead,

with its shrine to the Virgin Mary and medieval chapel ruins.

Now the water is piped to a newly built tap-

house 200 meters away, where huge excavators are biting into vineyards to make way for a parking lot. Bright blue portable toilets stand in a row nearby.

Whatever powers the waters possess, the people of Ranschbach see the spring as a They acknowledge that it is a great new source of income —a 5-liter (about one gallon)
plastic bottle of water costs 10 marks (about
\$4). But they also say the improvements they
have been forced to make around the spring

have cost 2 million marks.

The peace of the remote wine-growing area has given way to a steady stream of cars and visitors who churn up the red soil as they hike the last few hundred meters through the fields to the spring,

Foreign workers, especially Turks, form a large part of the water-seekers at the Roman Catholic shrine. But the crowds include many well-dressed German women, like the one in her early 40s who said she sought a cure for a

"I'm skeptical about what the water can do," she admits, "but when you're desperate, you grasp at the slenderest hopes."

Question:

# Four letters meaning two-for-one

If you purchased this Trib at a newsstand, you're already enjoying a rare bargain—the whole world in just a few rightly written, fact-packed pages. You're reading a product created by scores of journalists working day and night from dozens of distant datelines to bring you a compact compilation which can be purchased for the price of a cup of coffee.

But why not double the bargain? Enjoy twice as many newspapers with double the headlines, business trends, candid commentary, high fashion and comic strip hi-jinks, exciting sports and puzzling crosswords.

By subscribing to the International Herald Tribune for six months or a year, you receive each copy for as little as half the newsstand price. Up to 50% off, to be precise. Twice as many Tribs for your money.

Subscribe now and we'll speed bargain-price Tribs to your home or office from our various simultaneous distribution points in Paris, London, Zurich, Hong Kong and

Join the global who's who of thought-leader readers who turn to each morning's Trib for the latest in objectively reported world news, briskly written opinion, the day's closing business tabulations, buy-and-sell reports from the international market-place, at-the-stadium recaps of just-completed matches, what's happening in the world of culture—and all in an international perspective.

Double the value of the Trib by halving its price. Subscribe now so you don't miss a single issue. Just fill out the coupon below and mail. For maximum savings, subscribe for a full year. This cut-price subscription offer is for new subscribers only.

#### TECHNOLOGY

By AMIEL KORNEL

#### French 'Electronic Phone Book' **Brings Computer Age to Homes**

PARIS — France's aggressive program to computerize the nation and assure the development and commercial success of its high technology industries is getting a boost with the establishment of a nation-wide electronic telephone directory service.

The service was inangurated in Brittany in February and will begin operation in Paris later this year. In 1984 it will become available in most operation in Paris later this year. In 1984 it will become available in most major French cities, offering access to phone numbers and addresses from anywhere in the country. By 1990 every Frenchman will be able to turn in his paper telephone books in exchange for a small, easy-to-use, French-made Minitel computer terminal that can be hooked up to the telephone and will cost the individual nothing.

The project is just the beginning of a long-term effort to place the tools of modern information technology into every French home by the end of the decade.

By the 1990s you

will have an

"The directory is not a goal in itself," explained Jean-Paul Maury, head of the electronic directory project at the government-run Postal and Telecommunications "By the 1990s word monopoly, the PTT, "but rather a new means of communication that opens up [the possibility for] other

المحمدة وم

information society By the 1990s you will have an in France. information society in France," said Roy Bright, director of Intel-

matique, the international promo-tion arm of the French Telecommunications administration.

"France is in a unique position due to offering this technology for free," said Michel Gallet, an executive in the Data Systems Division of the Paris office of Philips, the Dutch electronics giant, because neither consumers, businesses, nor banks need worry about who will pay for terminals. He ascribes advances in videotex development in France to a "neitived will to computation excitation".

terminals. He ascribes advances in videotex development in France to a "political will to computerize society".

The government has already ordered 600,000 Minitels for the directory, and Louis Mexandean, Minister of Posts and Communication, has projected that three million will have been ordered by 1986 and 30 million by the 1990s. These same terminals are also compatible with other videotex systems. "Without the electronic directory we would not have the low-cost terminal," said Mr. Bright.

French officials are optimistic about the future of the electronic telephone directory poting that 15 of France's 22 regions have already applications.

phone directory, noting that 15 of France's 22 regions have already applied for the directory service.

If the videotex program continues to evolve as planned the financial stakes in the domestic mass market will be high. For example, Telic-Alcatel is selling Minitels for 3,300 francs per unit (\$450) and has already contracted to produce 400,000 for the PIT. In addition to Telic, state-owned Matra and the TRT-Radiotechnique group, in which Philips has approximately a 50-percent interest, are also selling Minitels in France and demandary.

Several companies including Olivetti, Flonic Schlumberger and Cii Honeywell Bull have begun, or are preparing to market peripheral devices such a printer and intelligent credit card readers (for telepayment) that are compatible with the Minitels.

And, at a time when the government is seeking to reverse the country's foreign trade deficit, the computerization effort aspires to open the door to a potentially multi-billion dollar domestic and international market for the nascent French telematics industry.

#### Computers and Communications

Telematics is the French term for the rapidly growing group of technologies that were born of the marriage between modern telecommunica tions and computers. With computers serving as centralized data banks for large masses of information, the telecommunications systems serve to distribute that information to other computers or remote terminals situated in homes or businesses.

The electronic directory is an application of videotex, one of the principal telematics technologies. Videotex systems distribute text and graphics to individuals via the public-telephone network. But most importantthey are interactive: Users can order or reserve products or services

The French videotex system, Telétel, was tested during the last two years, most notably in the Telétel 3V trial that included 2,241 households banks, public service sectors such as the railways, electronic newspapers,

Issuing directly from these experiments, the electronic "telephone book" is the first large-scale application of France's videotex technology. Once the first wave of 300,000 terminals has been installed, the directory

will be the largest interactive text system in the world.

For the PTT the transition from paper to electronic telephone directo ry will mean considerable savings in paper and printing costs as well as fewer information operators. For the public the move will mean an improved directory service. "We get the savings, the public gets a better service." said Mr. Maury.

A user seeking a phone number simply dials information on the telephone and, at the terminal; types the name of the person whose number is sought or the professional group for which he wants a listing. The PTT computer at the other end of the line searches for all corresponding entries in its memory and displays the information. Mr. Maury estimated that 80 percent of all inquiries will be satisfied within 15 seconds, including the contract of the professional seconds. ing the time needed to access the system.

# Morgan Formula: Orderly Change By Robert A. Bennett

NEW YORK - A spotless beige carpet stretches like a sea of tranquility across the executive floor of the Morgan Bank. The walls are paneled in oak. The haseboards are of green marble. Huge portraits of Morgan's past chairmen peer across the room from git frames. An antique grandfather clock quietly ticks away the minutes.

This image of orderliness and this aura of perfection are the trademarks of the House of Morgan and of its two primary components -I.P. Morgan & Co., the holding company, and Morgan Guaranty Trust, the bank.

Morgan is so well run and so profitable that it is the paragon of the banking industry. Bankers Trust openly tries to emulate it, and even Walter B. Wriston, Citicorp's supremely self-confident chairman, often uses Morgan as a model of profitability and a yardstick by which to measure how well a bank is run.

Last year, for example, Morgan — the fifth-largest U.S. bank holding company with assets of \$58.6 billion — earned 78 cents on each \$100 of average assets, higher than that of any other of the 15 largest bank holding companies.

For its first quarter of this year, the company said Wednesday, its earnings rose 37 percent to \$117.8 million from \$86 million.

But all is not as placid as it seems at Morgan, or as Morgan officials try to suggest. There are occasional frictions among its senior officers, even if they

are minor compared with what goes on at other banks. Morgan's problem loans have increased sharply as the result of the recession, even though the total remains small compared with other banks its size. And, like other major banks, Morgan is a big creditor to a number of financially troubled Third World countries.

Most challenging, however, is Morgan's struggle to plot its future in a changing financial world.

As other heading companies though heldly into provided and provided the property of the provided and provided the provided the provided and provided the provided

As other banking companies thrust boldly into new fields and press for interstate banking. Morgan's top officers are questioning whether their bank can continue along its well-tried but narrow course — shunning consumers that are not very rich and doing business only with governments and the largest and most prestigious of corpora-

Despite these concerns, Lewis T. Preston, Morgan's chairman and chief executive officer, declares that Morgan will stick to its basic business and not lower its sights. He says of Mr. Wriston, who has

#### A Cut Above the Rest

By these five key measures of bank . performance, the Morgan Guaranty Trust Company is at the top of the list of the nation's largest banks.

	RESULTS				
Earnings Per \$100 of assets	\$0.78				
Earnings Per employee	\$34,750				
Bad Loans As percent of total	0.23

been pushing Citicorp into a wide range of new fields: "He's running a financial conglomerate, and we're running a bank." But lending and deposit taking in themselves, have become less important today than a decade ago. To Mr. Preston, Morgan's mandate is to provide its clients — it always calls them "elients," not

"customers" - with sophisticated financial and money management Another critical element in Morgan's success is the impeccable training of its employees, from the guards in its lobby to its most

senior officers. Last year, for example, Graham Dolphin, a elerk who works in the vault at Morgan's London branch, noticed that some J.C. Penney bonds had a unusual feel to them. He reported it to his supervisor and it was discovered that 380 bonds, with a face value of \$5,000 each, were counterfeit. As a result, the payments were stopped and

Opel said that the company's new prodnets — including new models of its Personal Computer, System 38 with Prudential-Bache Securities, family of medium-size computers said before the carnings were re- and Series I group of general-pur-lessed that "an IBM net of \$1.65 pose minicomputers — "should would be very bracing both for the continue to have a positive effect market and for the company's on new order activity in 1983."

# Stock Prices in N.Y. Gain in Late Rally

NEW YORK - A late flurry of and Silverman, managing partner baying Thursday scut prices on the of Gruntal & Co., said it appeared New York Stock Exchange surging that the market was looking beahead, and the Dow Jones industriahead, and the Dow Jones industrial average closed at a record for the corporate profits being reported

orporate profits being reported "in anticipation of a strong economic upturn and mostly favorable corporate earnings in the second-hour rally caused the succession in a row.

The Dow average moved in a namicipation of a strong economic upturn and mostly favorable corporate earnings in the second-half of the year."

Because the Down close up 8.61 points at a record

Advances led declines by a two-to-one margin, and volume fell to 90.2 million shares from 100.52

**Dollar Surges** Against Franc

PARIS — The dollar was fixed here Thursday at a record high of 7.3190 francs, compared with Wednesday's fixing of 7.2780. The weakening of the frane

came as the government reported that inflation's pace quick-ened in March, with retail prices up an estimated 0.9 percent in March after an increase of 0.7 percent in February. The franc opened at 7.3240 to the dollar on the news, but eased slightly by the fixing. The previous high for dollar against the franc came last Nov. 12, when it was fixed at 7.3145 francs.

Dealers said rumors, later denied, that President Reagan had been assassinated Wedneshad been assassmated wednes-day night, briefly pushed the dollar as high as 7.33 francs. In New York, the dollar was quot-ed at 7.3225 francs.

# Major U.K. Banks **Lower Key Rates** Half Point to 10%

By Bob Hagerty

LONDON - Britain's big four clearing banks Thursday an-nounced cuts of half a percentage point in their base lending rates. reinforcing signs that the economy

is healing.
Some economists, however. warned that the upturn is likely to be short and feeble. "By and large," said David Kern, a senior economist at National Westminster Bank, "it's a modest and fragile re-

Even so, the lowering of the base rate to 10 percent offers a boost The reduction is the first since March 15, when the rate fell to 10½ from II percent. Late last year, the rate declined to 9 percent, but Britain quickly pushed rates back up when falling oil prices and polinical worries sent the pound into a dive.

The pound's strength over the past two weeks made Thursday's move possible. The cut was expected, and sterling held up well on foreign exchange markets. The trade-weighted index, which measures sterling against other major curren-cies and has slipped nearly 12 percent since last November, edged down 0.4 point Thursday to 82.4. Against the dollar, the pound also fell slightly, closing in London at \$1.5355.

coming from several directions.

Share prices have been climbing to record levels, in step with the worldwide trend. The Financial Times index of 30 leading industrial companies has advanced nearly 35 points so far this month. On

Thursday, it rose 1.8 to a record Retail sales have remained strong. The government recently reported that they were up 1.5 percent in the three months to Febru-

ary compared with the prior three The latest survey of the Confederation of British Industry also offered cheer, The CBI's surveys were relentlessly bleak in 1982, but the report issped late last month showed order books at their strongest level since December 1979. Recent signs that the U.S. economy is recovering faster than expect-

ed are another source of hope.

Treasury source said Thursday that the government has grown more optimistic in recent weeks but that the Treasury is hesitant about brightening its forecasts, remem-bering the "false dawn" of last spring, when reports that the economy was coming alive proved to be exaggerated.

Forecasts by banks and stockbrokers cluster around the Treasury prediction that gross domestic product will grow 2 percent this year after rising 0.5 percent in

Many forecasters see slightly laster growth in 1984, but some, in-eluding Paul Nield, chief econo-mist at the brokerage of Phillips & Drew, say the economy is likely to

slow next year. One worry is that higher infla-tion coupled with stagnant wages will choke off consumer spending. Retail price inflation has fallen to around 5 percent and is expected to edge lower in the next few months. Later in the year, however, economists believe prices will be rising at an annual rate of at least 6 percent as the weaker pound tran-

slates into higher import costs. Further dimming the outlook, economists round up the usual uncertainties: politics, oil prices and U.S. interest rates.

Encouraging economic signs are Prime Minister Margaret Thatcher must call elections by next spring at the latest. Until the election is past, the financial markets will remain edgy.

Some of Mrs, Thatcher's Conservative Party colleagues think she should call an election for June, when inflation is likely to be at a low point. "Certainly the markets would prefer a June election to remove uncertainty, said Keith Jones, chief economist at the brokerage of James Capel & Co. But Mrs. Thatcher seems to be leaning

toward a later vote. Oil prices appear to have leveled off for the moment. But, because Britain is a major oil producer, every wobble in the oil market weak-

ens the pound. The outlook for U.S. interest rates is a matter of conjecture. Without a further decline in those rates, economists say, British banks will have little scope for further Basking in this positive news, a cuts in their own rates.

# For the man with exceptional goals, a new dimension in banking services.

What makes Trade Development Bank exceptional? To start with, there is our policy of concentrating on things we do unusually well. For example, trade and export financing, foreign exchange and banknotes, money market transactions and precious metals.

Equally important, we are now even better placed to serve your needs, wherever you do business. Reason: We have recently joined the American Express Bank,

tries, to bring you a whole new dimension in banking services.

While we move fast in serving our clients, we're distinctly traditionalist in our basic policies. At the heart of our business is the maintenance of a strong and diversified deposit base. Our portfolio of assets is also well-diversified, and it is a point of principle with us to keep a conservative ratio of capital to depos-

its and a high degree of liquid-

"When we pounce," he said, "we like to pounce with a lot of money and know what we're getting into."

Asked what areas Morgan would consider, he said, "I like commercial banking I think I like the sent."

At Morgan, however, it is poor style to speak about personal ambition. So, when asked about his prospects, Mr. Smith responded that "we really don't spend much time worrying about those things bere, It's not a topic of thought, let

cial banking, I think I like the secu- alone discussion. rities business and I'm interested in

the insurance business."

In the meantime, Morgan has made other, less dramatic moves in the past year or two.

At the end of 1981, it investe \$200 million to establish a bank in Delaware, the Morgan Bank (Delaware), whose assets grew to almost \$1.7 billion by the end of 1982. Al-though Mr. Preston acknowledged that avoidance of New York City and New York state taxes w major reason for the move, he also said the operation was an experi-ment in interstate banking.

Earlier in 1981, Morgan became the first bank to open a subsidiary designed to deal in the technical but potentially highly lucrative, business of financial futures. The

#### German Banks Set Bonds for 1.67 Billion DM

Reuters
FRANKFURT — West German
hanks plan to issue 14 Deutschemark Eurobonds over the next five weeks for a total volume of 1.67 billion DM (\$690 million), bond market sources said Thursday

The program extends until May 20, when the next meeting of the Capital Markets Subcommittee will be held.

The first issue on the new calendar was brought to market Thurs-day afternoon, a 100-million-DM bond for Canadian Imperial Bank of Commerce lead managed by Commerzbank. The issue has a ? percent coupon and is priced at 99.

First reaction to the new calen dar was favorable, with new issue managers judging its volume as fairly modest compared with the previous list of new bonds, which totaled 1.65 hillion DM over four weeks.

#### Bayer's 1982 Profit Down 31%; Sharp Cut in Dividend Expected

LEVERKUSEN, West Germany (Reuters) — Bayer announced Thursday that its world group pre-tax profit fell 50.9 percent in 1982 and said it expects to cut its dividend sharply. The company paid 7 Deutsche marks (\$2.90) a share on 1981 results.

Bayer said 1982 profit was 970 million DM and sales volume fell 4 percent. Results were affected by low capacity use and further rises in the cost of energy, staff and raw materials, it said, adding that savings measures helped curb costs.

sures belood curb costs

Bayer said that in 1982 it was under pressure from the world recession; export business weakened further, although there was a recovery at home. The company said, however, that it planned to trim group capital spending in 1983 by only a small amount, to 1.5 billion DM from the 2.06 billion DM in 1982.

#### Hyatt Revises Bid for Braniff

DALLAS (Reuters) — Hyan Corp, has submitted an improved proposal to take over Braniff's airline operations. Braniff international said Thursday, Braniff filed for reorganization under federal bankruptcy laws last May and has until Monday to file a proposal for reorganizing itself. On Wednesday Braniff's unsecured creditors unanimously rejected Hyatt's earlier proposal. Howard Putnam, the Braniff chairman, said that the rejected Hyatt plan called for the hotel chain to loan Braniff \$10 million to get 30 planes into the air again, with the airline's creditors putting up an additional \$30 million. Brassiff executives have been quoted as saying it would take \$60 million to \$100 million to resurrect the

#### THE FIRST ELIZABETH

By Carolly Erickson. 428 pp. \$19.95. Summit Books, 1230 Ave. of the Americas.

New York, N.Y. 10020.

Reviewed by Thomas Flanagan

FASCINATION with the first Elizabeth beas "Gloriana" and poets sang her praises.

Monarchs, especially Tudor monarchs, expected such attentions, and Elizabeth, both as ruler and as woman, had more than her share of vanity. Much more was involved, however, than the courtier's instinctive flattery. The fascination was genuine, and was felt not by the court alone, but by all of England. And by much of Europe.

The English guessed and gossiped about the motley assortment of royal Europeans who sought her hand, and whom she played off skillfully, if skittishly, one against another. About her favorites and her actual or pretended lovers. And about the closely related question of her celebrated virginity - a question which, as she advanced in years, became increasingly unseemly. There was curiosity, even, as to her gender, for she was less a queen who ruled as kings did than a being who ruled as

both queen and king, a hermaphrodite foun-tainhead of authority.

This fascination had deep and complex sources within the culture of her age. The victory at Bosworth in 1485 of her grandfather, Henry VII, had brought the War of the Roses to a close and the Tudors to the English throne, Her father, Henry VIII, had begun his reign amidst the splendors of a new dynasty, but his quest for a male heir led to England's break with the Church of Rome, a break that laid bare deep fissures within a society moving from a medieval to a modern culture.

The perils of the times were reflected in Elizabeth's precarious childhood and young womanhood. She was a pawn in the contests between the Catholic and Protestant factions, and was preceded to the throne by her siblings, Edward, a sickly Protestant, and Mary, a pious and murderous Catholic. Fortunately for herself, and probably for England, she brought to her dangers a first-rate mind, a subtle and country to the contract of the contract o rageous temperament, a well-honed instinct for survival and a bravura style.

When we now look back upon the triumphs of Elizabethan England, we are likely to forget what a precarious world it was, and especially to forget the dangers that attended Elizabeth's uncertain progress to the throne and the dan-gers that overshadowed the first half of her reign. Carolly Erickson's biography reminds us

Erickson has an eye for details that are at once picturesque and revelatory, and a gift for setting her chief scenes aglow with the appro-priate colors of gems, silks, tapestries, sword blades and crown

She opens with the ceremonial ride of Anne Boleyn to her coronation: "The afternoon sun was already low as the constables and marshals, their great staves ready in their hands, took up their station along the route the royal procession would follow. They were liveries of velvet and silk, in keeping with the pomp of the occasion, but their function would be more

than ceremonial this day."

And she ends, of course, with the great queen's death: "Several hours later Dr. Parry,

Queen Elizabeth

perceiving that the end had come and beginning earnestly to pray for the queen's soul, indicated that she was dead. The word was passed, the rider mounted, and then the sound of galloping hoofbeats echoed through the rainy night."

These opening and closing sentences offer fair instances of Erickson's style - vivid. precise, and alert for theatrical effect. They also, unfortunately, suggest the level of histori-cal attention at which the biography is written.

"The First Elizabeth" is, by its intention, popular history. And there has never been greater need than now for histories and biographies to which educated and intellectually curions readers can have access. Instead, professional history has become a discipline increasingly arcane, specialized and minute. Popular history at its best, however, as with Barbara Tuchman and Lady Antonia Fraser, does far

more than Erickson has allowed herself to do. Thus, Fraser, in her biographies of Mary Queen of Scots, of Oliver Cromwell, of Charles II, displays, like Erickson, a firm and delighted grasp of personality. But she has also an abilito relate her great personages to their historical moments and to the political, economic and cultural worlds in which they moved. And the does so by a masterly and massive deployment of the researches of more "professional

Erickson, in contrast, is content with the simply picturesque. But Elizabeth, if presented without a deep surrounding background of the Elizabethan world, is necessarily a cardboard figure, no matter how exact or how skillful the . coloring.

The poets and courtiers, when they celebrated Elizabeth as "Gloriana," were celebrating what was little less than a social revolution and a cultural transformation, of which the queen was the dazzling, irascible and dangerous em-bodiment. Elizabeth without her society does not present us with quite the problem of a "Hamlet" without the prince, but it can leave us equally unsatisfied.

Thomas Flanagan, the author of "The Year of the French," which received the National Book Critics Circle Award for fiction in 1979, wrote this review for The Washington Post.

LONDON — Soviet jamming of Western broadcasts could lead to chaos on international radio frechaos on international radio frequencies, a British radio executive said Thursday.

Douglas Muggeridge, managing director of the British Broadcasting Corp.'s external services, said there was a risk of "breakdown of law and order on the airwaves." Mr. Muggeridge said it was estimated that Moscow's annual spending on ianuring broadcasts of other comjamming broadcasts of other coun-tries was equivalent to the entire budget of the BBCs external ser-

the hard-hitting Brewers to only center-field fence for a ninth-infour hits over eight innings in pitching the Blue Jays in a 7-2 victory over Milwaukee. Clancy, who led the league with 40 starts last

BASEBALL ROUNDUP year, retired 14 straight batters after allowing a run in the first. He struck out four and walked two be-

fore being replaced by Joey McLaughlin, who struck out the side in the ninth. Indians 4, Rangers 3 In Cleveland, Bake McBride singled home Mike Hargrove with the

winning run in the seventh inning to give Len Barker his second victory and pace the Indians to a 4-3 victory over Texas. Barker, who wen) eight innings, struck ou) four, walked none and allowed eight hits. Dan Spillner buried the ninth inning in pick up his third save. A's 5, Twins 4

In Oakland, Boh Kearney's twoout single in the eighth inning knocked in two runs and lifted the A's to a 5-4 triumph over Minnesota. Steve Baker (1-0) pitched 31/3 innings in relief of Tom Underwood to get the victory. Davey Lopes homered for Oakland.

Tigers 7, Yankees 5 In New York, Johnny Grubb knocked in three runs with a double and single and Glenn Wilson hit a bases-empty home run to lead Detroit over the Yankees. Dave Winfield, the Yankee centerfielder, was ejected in the fifth after running out to the mound and throwing a punch at Dave Rozema, who had let go of a pitch that sailed over Winfield's head. Rozema ducked the punch, but both benches cleared

Angels 6, Mariners 1 In Anaheim, California, Geoff Zahn pitched a four-hitter and Doug DeCinces hit a two-run homer to carry the Angels over Seattle. The 36-year-old left-hander lost his shutout bid in the ninth on a pair of hits and Manny Castillo's RBI groundout.

Phillies 10, Mets 9 In the National League, at Philadelphia, Bo Diaz hit reliever Neil Allen's fourth pitch over the left-

center-field fence for a ninth-in-ning grand slam to propel Philadel-phia to a 16-9 victory over the New York Mets. Diaz's hit was the only one in the five-run inning. Allen (0-2) lost his second game in two days to the Phillies. Porfi Altamirano (1-0) the fourth Philadelphia pitcher, was the lucky winner. was the lucky winner.

Dodgers 5, Astros 3 in Los Angeles, Steve Yeager hit two-out, two-run home run in the 14th inning to lift the Dodgers over Houston, 5-3. Yeager homered off Frank LaCorte (0-2) after Derrell Thomas had doubled. Pat Zachry carned the victory for his first decision of the season. Houston has dropped nine straight games to tie the National League record for losses at the start of a season held by three clubs, the last being the 1962 New York Mets.

Braves 6, Reds 1

In Atlanta, powered by Chris Chambliss's two homers and three RBIs, the Braves coasted past Cincinnati, 6-1, for their seventh straight victory. Chambliss hit a two-run shot off Frank Pastore (1-1) in the second and added a basesempty homer leading off the sixth. Rick Camp (1-0) pitched 7% inn-ings and scattered 10 singles before Gene Garber finished up.

Cardinals 9, Pirates 1 In Pittsburgh, George Hendrick, who went 5-for-5, knocked in four runs with a pair of homers and a single, and Joaquin Andujar (2-0) pitched a seven-hister to pace St. Louis to a 9-1 rout of Pittsburgh. Audujar struck out five and walked none in going the distance for the second time. Hendrick, who led a

Show and Gary Lucas combined on an eight-hitter as the Padres snapped a five-game losing streak with a 2-1 victory over San Francisco. Atlee Hammaker (0-1) was the

Larry Bittner, the Rangers' rightfielder, crashed to the turf after diving in an unsucces ful attempt to catch a fly ball from the Indians' George Vuckovich. The Indians won, 4-3.

## **Jury Awards Damages** Of \$16.41 Million to Raiders and Coliseum

By Robert Lindsey New York Times Service
LOS ANGELES — A jury has LOS ANGELES — A jury has awarded \$16.41 million in antitrust damages to the Los Angeles Raiders and the Los Angeles Memorial Coliscum Commission in their suit against the National Football League. The suit involved the league's efforts to block the transfer of the Reiders from Caldand to fer of the Raiders from Oakland to

Los Angeles more than four years

After almost four days of deliberation, the same jury of six wom-en that found the league guilty last May 7 of violating federal trust statutes awarded the Raiders \$11.55 million and the Coliseum

\$4.86 million. Under federal trust law, the damages determined by the jury will be tripled, meaning that the league faces penalties of \$49.2 mil-lion. It is expected to appeal the

While the jurors assessed the league about half the damages sought by the Raiders, the Coliseum's award was virtually the amount it had requested.

Joseph L. Alioto, the attorney representing the Raiders, said that the team and the Coliseum Commission would file papers with the court asking an additional \$10 milbon to cover legal fees.

The league last Thursday ap-pealed the jury's original findings of antitrust culpability to a federal appellate court. In addition, the city of Oakland has brought an ement-domain action against the Raiders seeking to force them to return to Oakland for the public good. That case is scheduled to begin May 17 at Salinas, California. Wednesday's verdict was

reached after almost 17 days of tes-timony, in which attorneys for both sides argued over the extent to which the league's rule forbidding franchise transfers without three-quarters approval of NFL owners had caused damage.

The jurors and U.S. District Judge Harry Pregerson were told by Alioto that the team had suf-

fered damages of almost \$20 mil-

lion. His claim was based on a pro-jection of attendance figures had the Raiders begun playing in the Coliscum in 1980. He estimated an average attendance of 80,000 a game in 1980, 83,000 in 1981 and 85,000 in 1982. in his closing argument, Alioto told the jurors: "Hit the monopo-

# The Peace Race

By Russell Baker

NEW YORK -- Our orgotiations, you will recall, began when satellite photography re-vealed that the Western bloc was bristling with 32 million peace demonstrators, while the Soviet Union had only 27. We advised the Russians that we were as unhappy with this disproportion as they must be and said we would not regard an increase in the oumber of soviet peace demonstrators as a

threatening buildup for peace.

As a gesture of good will we opened the Geneva talks with a magnanimous offer, the so-called "two-for-one option," under which, the West would have been permitted a maximum of 50 million peace demonstrators, while the Russians would have been entitled to 100 millioo.

Moscow replied with a propaganda campaign. By encouraging the Soviets to tolerate 100 million demonstrators, they said, we were trying to create a worldwide im-pression that the Soviet Union was

Uoder pressure from our European allies, we countered this by offering the "fifty-fifty option." Both sides would be allowed only 50 millioo demonstrators.

Always the nitpickers, the Russians objected to a minor clause that required them to include 750,000 folk singers in their cadres. "It is unfair that we should be allowed 750,000 folk singers while the U.S. proposal would limit their side to only 237." Foreign Minister Gromyko told Pravda.

The talks might have collapsed on this point had the president not declassified intelligence satellite pictures showing that the United States had another 749,763 folk singers performing on domestic radio day and night.

The Soviets attempted to wriggle out of this, stating that they had a shortage of folk singers. This led immediately to what American radio audiences later called one of the most splendid offers one superpower had ever made to another. We offered to ship Moscow 725,000 folk singers in excellent

voice and itching to sing for peace. Our offer was ridiculed by Yuri Andropov, the Soviet party leader.
"The heart of every Soviet citizen sings for peace every day without

accompaniment," he said. "Per-haps the capitalists hope to divert our robust Russian peace movement by sending banjo-plucking hooligans to divert them with such imperialist ditties as 'Way Down Upon the Volga River and 'I Dream of Ronnie with the Dark Brown Hair."

This harsb reference to the presi dent's hair revived fear of a renew-al of the Cold War, which was characterized by vicious comment from both sides about the hair of opposing superpower leaders. Dip-lomatic observers recalled that af-ter meeting President Kennedy in Vienna in 1961, the bald-beaded Soviet premier, Nikita Khrushchev, created the Tonsorial Crisis by accusing Kennedy of wearing a toupee to give a false impression that the United States had outdistanced the Soviet Union in hair.

We shifted our bargaining ground immediately. "Since we re-alize that the Soviet Union's manpower requirements for its immense war and prison apparatus make it difficult to spare the per-sonnel needed for a lorce of 50 million peace demonstrators any time soon," we said, "we herewith offer to send you our entire 32 million, most of whom are raring for new missile sites, bomb plants and military bases to picket.

In reply, the Russians accused us of trying to destroy Soviet justice and mental health with a scheme to pack their crowded prisoos and psychiatric wards.

At this stage we had won the battle Ior public opinion, and the Russians knew it.

To recoup their losses in world opinion, they announced that they had increased the oumber of their peace demonstrators from 27 to 33, given them an office in the Kremin and assigned them to come to Geneva to demonstrate against our negotiating team.

In the spirit of peace and mutual cooperation, they said, they de-manded that we provide 30,000 Western demonstrators to join them in denouncing us. We had to agree or risk losing world opinion, but the final triumph was ours, thanks to the hrilliant undercover work of the CIA, which speot the night before the demonstration slashing the strings of 1.500 banjos. # Slouching Toward 'Salvador'

Joan Didion: A Slim Book Speaks Volumes on the Mechanism of Fear

By Paul Hendrickson

Washington Past Service

WASHINGTON — It seems a book as small and thin as the author hersmall and thin as the author her-self, as the country itself, perhaps a mere 20,000 words, an oddly elongated book with but a one-word title jumping off its glossy midnight-black jacket: "Salvador." She was always tired down there. No-body thought of anything else but la situa-cion. It didn't seem to matter whether you ate well, or slept well, or took notes well, or in fact did anything well. For things would always oot be what they appeared in El Salvador. Riddles would come wrapped in riddles, And ever, the capital's queasy mood of "ambiguous tension," of overcast, of "wary somnambulism."

San Didion had come to Washington with her novelist busband and her quixotically named 17-year-old daughter. The daughter's name is Quintana Roo, after a territory in Yucatan. "Hi," says John Gre-gory Dunne, the busband, offering a quick shake with a thick hand. He is about to leave on an errand. "I just dread it, talking to strangers," Joan Didion is saying in the scantest voice imaginable, the voice of a wraith, or at least a very old child. "I don't like to talk much at all. I don't think well except in Iroot of a typewriter — and may be oot even then, except I do revise well." She laughs loudly at this, and it crupts sud-denly, harmless gunfire.

"I said I'd go to New York and Washington this time. I didn't do any publicity on my last book. Oh, I did an interview with The New York Times. But if you wrote a 110-page book about El Salvador - after all, it was a pretty cervy thing to - you ought to be able to come down and talk about it."

Last Jime, Joan Didion and her husband visited El Salvador for two weeks, flying from Los Angeles in the middle of the night, arriving in the wet season when the coffee spread richly down every ravine and the earth looked so lush and translucent that is, when it didn't look mad and bloodriver-red — then getting the hell out, walk-ing straight out onto the airport's macadam without looking hack, sitting "rigid until the plane left the ground."

"I remember it was a summer night when we came back up, and we landed at JFK, and some taxi drivers were having an argument. I jumped. I was terrified. It was as if the A-37s were coming over again,"

An A-37 is a twin-jet quick-attack aircraft. The first time Didica saw one up close was the day she and her party went up to San Francisco Gotera and suddenly there were screaming planes overhead.

San Francisco Gotera is a beaten-up lit-

tle place, and Didion and her party stood in the sun that day and drank soft drinks and took surreptitious notes. In the after-noon they sal on a porch with some Irish priests and two nuns. "The light on the porch," she later wrote, "was cool and aqueous, filtered through ferns and hibiscus, and there were old wicker rockers and a map of Parroquia San Francisco Gotera and a wooden table with a typewriter, a can of Planter's Mixed Nuts, copies of Lives of the Saints." Then the planes

She is trying to mime an A-37 screaming low. The small arm holds for an instant. low. The small arm holds for an instant, theo dive-bombs toward a queen-size bed and some far-off icon of memory. "I mean, I practically went under the chair. John gasped, And one of the priests smiled and said, "Uh, one of yours, I think."

Io her book of essays, "Slouching Toward Bethlehem," Didioo described herself as "so physically small, so temperamentally unohtrusive, and so neurotically inarticulate that people tend to forcet that

marticulate that people tend to forget that my presence runs counter to their best in-terests. And it always does."

Once a magazine asked her to send in a portrait of herself. She submitted a thumb print accompanied by this: "This is Joan Didion Dunne, 5-Ieet 2-inches, 95 pounds, hair red, eyes hazel. Must wear corrective lenses. Too thin, Astigmatic, Has oo visual sense of herself."

But looks deceive. If this fragile stylist, and the slim book she has produced lie in wait to fool you, to explode in your face, how much more this tiny country, a whole Central American nation smaller than some California counties. A smallness, Joan Didion notes wryly, that keeps stoking "the illusion that the place can be managed, salvaged, a kind of pilot project, like TVA." And all the king's men — or at least a U.S. president's - can't seem to put it

together again.
Didioo suffered no physical harm in her brief stay, though she was in harm's way on several occasions and describes it. But her point is not what happened to her as much as what could have happened. That is part of the mechanism of fear she is trying to make her readers understand. "I recall a day in San Benito when I

opened my bag to check an address, and heard the clicking of metal on metal all up and down the street. On the whole oo one walks up here, and pools of blossoms lie undisturbed on the sidewalks," "Here's something," she says suddenly, jerking from the chair. "I found myself

smiling too much at roadblocks. I was

afraid, you see, and was trying to ingratiate

myself in a silly way."

"Salvador," which took two weeks of on-scene reporting and about four months of writing, sets oo view that now familiar Didionesque apocalyptic world where things go rotten from the inside.

But this time the world she has chroni-cled is madder, a world of body dumps and searches by gunpoint at a shopping center, a country where "the most ordinary errand can go bad," where things can be often more than they seem and look less, and where other things can be less than they seem and so kess than they seem and so kess than the seem as the seem and seem and seem as the seem as the seem and seem as the seem as the seem as the seem and seem as the s they seem and mean more. A place, quite simply, where everything gets called into question. And all of it brought off with her diptical, understated eloquence.

Ton understated and too elliptical, detractors would say. Not that she doesn't serve up some grotesquerie, making your flesh crawl with it. "In El Salvador one learns that vultures go first lor the soft tissues, for the eyes, the exposed genitalia, the open mouth. One learns that an open mouth can be used to make a specific point, can be stuffed with something emblematic . . . with a penis, or, if the point has something to do with land title, stuffed with some of the dirt in question."

What some have been wanting to know, despite the beauty of her prose, is this: Were two weeks enough? In the Los Angeles Times, her local paper, a letter writer asked: "Let me get this straight: Joan Didioo spends two weeks in El Salvador and widdle here were the straight of the straight. suddenly becomes a higger expert oo this country than anyone who has previously covered it. How can this be? She has no

background as a historian."
"Ah," she says, grinning, nodding, "It's what we do, isn't it?"

If terror is the "given" of El Salvador, presumption is the given of writers. "You can say that what you see in your whole life might not be representative. That is the risk you take no matter what you do, or long you do it, isn't it? Actually, the only piece I ever did that took longer was Haight-Ashbury. And I had a sly advan-tage this time in that I had been a sort of amateur student of Central America for about 10 years. So I did not go exactly tabula rasa. Then, too, there was no sense of oot being able to go back, if one wanted. And, as a matter of fact, when I went down, I didn't even know whether I was going to write anything at all, an article, a book. John and I went down with the idea that one of us might write something. After I was there a few days we decided I would be the one to write.

"It was a total immersion experience. The intensity of it was . . . total. So, in that sense, two weeks seemed, at that point, probably, enough.

Author Didion: "I wanted to get the physical reality, the way it felt.

She had her busband along. He was both protector and source, another pair of eyes, another pair of hands. How a husband-and-wife writing team makes it from week to week without filing for divorce is any-body's guess, but for Mrs. Didion-Dunne, it seems to work. (They have written screenplays together and made a bundle.)

"John took copious notes. And be had his own reasons: He's writing a novel in which one character is an observer in a Central American election. When we typed our notes we found there was very little overlan."

A reviewer for Playboy, a magazine she ads "irregularly." has praised the book (as has practically every other reviewer).
"Well, it was a very limited objective.
What I had in mind was to render a place. Render the sense of a place. I wanted to get the physical reality, the way it felt down. Television is good for that, you know, getting the sense of a place down. But somehow I had no sense of El Salvador. I didn't even have the landscape down. Actually, I wanted to publish it, if at all, in paper. There was something provi-sional about it." However, her publisher convinced her it should be published in

Would she have gone without her husband? She studies it. "Yes, I would have gone down. I might have put it off longer." Do you ever muse of moving back East? (Didion lived in New York and worked at Vogue out of college.) "Actually, I would like now to spend several months in Lon-don. I like the feeling of twilight there in the summer. If you go out to dinner and come back later you can walk and see such gorgeous light. There are always green parks you can go into."

She is growing tired. There is the sense

of needing to conserve.
"I'm not interested in what people say." says Didion. What then is she interested in? "It would be glib to say, 'What they don't say,' But," And at this she grins.

#### PEOPLE

Texas Oilman Plans 3d Search for Titanic

The Texas oilman Jack F. Grim will fund a third project to try 1? locate the sunken British liner T! tanic, which went down to the North Atlantic 7) years ago. "May be the third time will be the charmer," he said, referring to expensions the financial in 1880, and cursions he financed in 1980 and 1981. Grimm said William Ryan o Columbia University's Lamont Doherty Geological Observator would direct the search. The ball will leave Halifax, Nova Scoti:

Alice Walker's "The Color Purple" and Fox Butterfield's "China Alive in the Bitter Sea" will seed. the 1983 American Book Award. Walker's work captured the awar in the hardcover fiction categor and Butterfield won the hardcove general non-fiction prize. Winning the history category was Ala.

Brinkley's "Voices of Protes Huey Long, Father Coughlio and the Great Depression." Judit.

Tharman won the bardcover and the coughlion of the bardcover and the coughlion of the bardcover and the coughling of the coughly because the coughly become the coughly because the coughly become the coughly be biography-biography prize fullsak Dinesen: The Life of a Story

When "Equus" played on Broad way, it won a Tony Award, bt3 Texas vice-squad critics are 5 sterner bunch. They tonk one lock at the play's 45-second oude scer-at the Encore Theater Company is Corpus Christi and lifted the pt cense that permits the theater is sion. The play is about a stable but whose passion for horses carrie-sexual overtones that render hird unable to make love to a girl, bran all the cops saw was "two stark ne ked people on stage simulating the sex act. The vice squad didn't final the play obscene, but Texas lark says you can't serve alcohol when's there is oudity. Says the theater of founder Jan Smally, who expeced to get ber license back wheo tild play closes, "They dido't unded; stand the story."
